SECRET
CLASSIFICATION

50-6-32/2

TO : Chief, WH Division

DATE: 9 July 1958

FROM : Chief of Station, Mexico City

SUBJECT: GENERAL— LIFEAT

SPECIFIC— Daniel K. ROMAN (P) —crossed out—

ACTION REQUESTED: None, information only

1. Subject's application for "rentista" status in Mexico is being processed by Gobernacion and LIKAYAK/2 has been requested by Gobernacion Undersecretary Fernando ROMAN Lugo to check with ODYOKE as to whether Subject has any derogatory background. ROMAN Lugo is particularly interested in preventing any American with Communist connection from settling in Mexico.

2. Subject is described as a North American of Russian origin; the origin is probably what brought about the request for traces, and the Station for the time being attaches no other significance to the query.

3. LIKAYAK/2 is being told that there is no derogatory information on Subject and that if any are developed through a query to Headquarters, he will be notified. No further action is contemplated.

3 FEB 1959

- Personnel for WHD reporting

RE: HMAA-9069, 31 December 1957

ACTION REQUESTED: None, for information only.

1. The Station's request for the assignment of either a PLS or IT clerk-typist experienced in SENSAP reporting has been discussed with the SR Division. Both the SR and WH Divisions recognize the Station's need for such an individual; however, it is at this time impossible to acquire an additional slot for the PLS assignment of an employee and it is not believed feasible to assign individuals on an extended IT basis.

2. Although the rotational field training program suggested by the Station would appear initially to be an excellent way to solve the referenced problem, Headquarters believes that the long-run effect would not achieve the desired results. This opinion is based primarily on the lack of qualified Headquarters employees with the necessary field experience. Also significant is the fact that a rotation of this type would provide a slot for the field employee, thereby reducing the total slots normally available to that office - a troublesome problem under the present personnel ceiling.

3. The SR Division has suggested that they would be glad to provide SENSAP training to the next competent lady employee scheduled for PLS assignment to the Station. This, of course, would not increase the Station's T/O; it would only transfer an employee from one station job to another. Should you have any desires along this line, please advise Headquarters.

ACTION: HRM/HRM: None, for information only.

1. The Station's request for the assignment of either a P/S or FBI clerk-typist experienced in HRM reporting has been discussed with the HR Division. Both the HR and FBI Divisions recognize the Station's need for such an individual; however, it is at this time impossible to acquire an additional slot for the HR assignment of an employee and it is not believed feasible to assign individuals on an extended TDY basis.

2. Although the rotational field training program suggested by the Station would appear initially to be an excellent way to solve the referenced problem, Headquarters believes that the long-term effect would not achieve the desired results. Its main objection is based primarily on the lack of a qualified Headquarters employee to fill the vacant slot. Also of concern is the fact that the Headquarters office will have to provide a slot for the employee, thereby reducing by one the total slots normally available to that office - a troublesome problem under the present personnel ceiling.

3. The HR Division has suggested that they would be glad to provide HRM training to the most competent duty employee scheduled for HR assignment to the station. This, of course, would not increase the Station's T/O; it would only transfer an employee from one station job to another. Should you have any desires along this line, please advise Headquarters.

SUBJECT { GENERAL - Operational/LINEAT Support
SPECIFIC - Concealment Device for Use by Daniel E. BRANUM
(201-216511)

1. In answer to a special request by Daniel E. BRANUM and approved by the WH Division, KENIOT has constructed a bookcase containing a concealment area for his use in connection with the LINEAT Project. This bookcase is now being packed for shipment. The Station will be advised later of the method of shipment and the ETA. Instructions for its use are u/s/c. If the Station has no objection to its use by BRANUM it is requested that it be delivered to him.

2. If the Station believes that additional similar concealment devices would be of use under LINEAT Project, it is requested that you forward to Headquarters your suggestions and comments, furnishing details as to quantity, size and prospective use. Your request will then be referred to KENIOT.

20 December 1957

CONCEALMENT - BOOKCASE

Work Order 2176

(CDB-106)

A bookcase 42" x 48" x 12" was made with a concealment area. The bookcase was made from pine and painted flat black. The concealment area is 1-5/8" x 10-1/2" x 46" and is located under the bottom shelf and covered by the kick panel.

The kick panel must be opened in order to gain access to the concealment area. This panel is held in place with a positive locking device. The locking device is located under the front-center section of the bottom shelf. It is located beneath a filled nail hole. The locking device is released by inserting a table knife blade - or similar piece of metal - between the bottom shelf and kick panel and, pushing toward the rear of the case, a distance of approximately 2", at the above-designated point. To facilitate inserting the blade on a loaded shelf, lift upward on the center part of the bottom shelf until the lock releases. When the lock is released, the kick panel may be moved by pressing inward on the bottom edge of the panel. After the panel has been moved slightly withdraw the knife so that the under surface of the shelf is not marked; then complete opening the panel. It is important that the kick panel not be forced beyond its maximum opening point approximately 70 degrees from vertical.

To close the panel, return it to its original position by pressing inward on the top edge until the lock snaps into place. Test for locking by pushing inward on the bottom edge.

MEMORANDUM FOR: WH/Logistics

SUBJECT: Purchase of Metal Storage Cans and Deluxe Carrying Cases

1. The Mexican desk has received an oral request from the field for metal cases to replace the cardboard boxes which are now used for audio tapes in the LIFEAT Project. The cardboard boxes used to protect the tapes wear out in a very short time because of the frequent handling which they receive at the Station.

2. It is requested that you purchase and ship to the Mexican Station, the following items which can be purchased from LAFAYETTE RADCO, 165-08 Liberty Avenue, Jamaica 33, New York (seen in catalog 305):

100 Metal Storage Cans for 7" 1200 foot reels	\$.39 each (in lots of 6)
3 Deluxe Carrying Cases - hold 35 reels in case	\$5.40 each

3. The costs of the above items should be charged to Project LIFEAT.

Chief of Station, Mexico City

Chief, WHD

- LIT-AT

- Serialize Mexico City Telephone Directory

Reference: TONA-7337, 3 July 1957 (50-1-12/3)

1. Reference requested serialization of the Mexico City telephone directory by street address. The matter was discussed with the Headquarters units concerned with this type of work. Due to the time required to complete this job and because of the existing heavy work load, they are unable to undertake this requirement. The requirement could be filled by another government agency after the directory was reduced to abstracts based on a numerical coding system. The outside agency would then punch the coded addresses and indices onto cards at a cost of \$75 per thousand or \$6,250 for 110,000 addresses. A full time person with a knowledge of Spanish would have to be assigned by WHD for this work.
2. The major part of the job would be the first step—the coding—which is estimated would require a person's full time for eight to ten months. The second step—the key punching—would take about two months. The third step—a machine listing—would be a fairly rapid process.
3. Because of the cost and the shortage of personnel, Headquarters regrets that it is unable to undertake the serialization job at this time.

MEMORANDUM FOR: WH/Personnel

SUBJECT: Recruitment of a Retired CIA or Military Officer for Contract Status in Mexico.

1. Mexico City needs a replacement in September or October 1963 to work on a technical operation. The Station does not want a staff employee, but a Contract Agent.

2. The Contract Agent would need the following requirements:

a. Must be retired, and move permanently to Mexico under cover of a retired U. S. citizen, with the appropriate guaranteed income required under Mexican law. (\$320 for husband and wife *per mo*)

b. Must have technical training which would enable him to work on a technical operation, possibly involving the care and upkeep of recorders, etc.

c. Must have a working knowledge of Spanish, or the ability to acquire this fluency prior to arrival in Mexico.

d. It will be necessary for the employee to work with people, make early and late meetings, and to spend a good deal of time driving around town. Therefore, the candidate must drive a car and be physically fit to work long hours.

3. It is requested that information on any candidates be furnished WH/3/MEXICO or C/WH/3 for consideration.

PROCESSING

TO: Chief of Station, Mexico City

INFO:

FROM:

Chief, WH Division

SUBJECT:

LIFEAT Security

ACTION REQUIRED REFERENCES

REF: HMA 20305, 3 December 1962

1. Reference problem was discussed by KURIOT with David M. WILSTED, during the latter's TDY at Headquarters in early December 1962.

2. KURIOT recommends the following solution and has furnished the attached material for delivery to WILSTED for his use:

a. The terminal identification system consists of two fluids. Vial "A" is collodion in which is mixed a small amount of phenolphthalein and is intended to be used by the person who originally connects the wires. Generously daubed on the end of the screw, this solution dries almost immediately in a water repellent, invisible coating.

b. The second vial "B" contains household ammonia. If the bauber in this bottle is drawn down the row of terminals in the connection box, the tip of any screw which was previously treated with the phenolphthalein will immediately turn a dark red color and then will vanish after a minute. The ammonia can be reapplied and this reaction will repeat itself a couple of times before more phenolphthalein has to be reapplied.

SUBJECT O LIFEAT Security																
ACTION REQUIRED - REFERENCES																
<p>Action: See below.</p> <ol style="list-style-type: none"> 1. The purpose of this dispatch is to request Headquarters' assistance in a problem involving clandestine markings for terminals in a telephone cable cross box. 2. Specifically, it is desired to have the capability of recognizing which cable terminals in a box are being used for telephone tapping without having any markings apparent to unauthorized persons. This system is needed for use in the event that taps must be disconnected quickly under the threat of a possible security problem. 3. The tap connections are made by LIFEAT telephone company personnel and the terminals could be marked by them at the time the tap is made. The connections sometimes have to be removed by another person who is not familiar with the connections. 4. It is felt that a quick drying, transparent glue or lacquer that would fluoresce brightly under UV illumination would be appropriate. A material that could be removed later by wiping or chipping it away would be desirable but this characteristic is not vital. 5. The system must be usable in open shade, although some additional shade might be had by partially closing the doors of the box, and the light source must be portable and if possible have the appearance of an ordinary flashlight. The light source can be brought within two inches of the terminals.

INFO				MARKED FOR INDEXING
FROM	Chief of Station, Mexico City			NO INDEXING REQUIRED
SUBJECT	LIFEAT Progress Report for October 1962			ONLY QUALIFIED HEADQUARTERS DESA CAN JUDGE INDEXING
				ABSTRACT
ACTION REQUIRED - REFERENCES				ACCOMPLISHED
Ref: A. HMMA-20156 B. MEXI 2384				
1. The following report is submitted in accordance with CSFHB-F 52-6-1, section V, paragraph 2 (d) (1).				
A. <u>EXPLOITATION OF LEADS</u>				
(1) LIFEAT/Soviet During the reporting period, LIFEAT coverage of Svyatoslav F. KUZNETSOV provided an important and valuable check confirming the reporting of a number of KUBARK controlled double agents targeted against this Soviet officer. Also, coverage of the Soviet Bulletin Office, although not considered vital, does complete Station coverage of the Soviet target and does provide daily information on the activities and contacts of the Bulletin Office personnel.				
(2) LIFEAT/Polish LIFEAT continued to provide vital information concerning the BEKNAVE/BECHICK operation with coverage of both individuals and their daily activities.				
(3) LIFEAT/Yugoslav Besides the usual coverage of day-to-day activities of the official installation, LIFEAT leads have indicated the possibility of a successful recruitment of a Mexican employee of that installation. LIFEAT information will become even more valuable for continuing assessment of the potential agent and forming of a plan for approach to the Mexican in question.				
(4) LIFEAT/Communist Party Coverage in this area gave Station its first information concerning the second arrest of LINLUCK, as well as providing some information on important persons in the Mexican Communist movement.

CLASSIFICATION SECRET				

(5) LIFEAT/Exile LIFEAT provides continuing coverage of the daily activities and contacts of Juan Jose AREVALO Bermejo. Although most of the leads gathered will depend on future exploitation, one contact with an ODYKE official was noted by LIFEAT (see reference b).

(6) LIFEAT/Cuban Of late, much of the emphasis of the LIFEAT operation has been directed toward support of Station operations in this area. Coverage included monitoring of the activities of AMSTET-1 for the interested Case Officer. This information provided daily leads for the Case Officer in his contacts with AMSTET-1. LIFEAT also covered three lines in support of the AMSTRUT operation. Of this support the interested Case Officer has noted LIFEAT provided very valuable coverage of the important AMSTRUT operation during October. The coverage gave valuable operational leads and resolved what would otherwise have been areas of uncertainty or groundless suspicion. This allowed the case officers to move with more certainty in developing the operation than would otherwise have been prudently possible. It is noted that LIFEAT's continuing coverage is proving to be most helpful.

(7) LIFEAT/American Communists LIFEAT continued to provide information of interest to ODENVY. Travel and contacts of the ACGM are particularly worthwhile.

(8) LIFEAT/Miscellaneous LIFEAT continued its coverage of former Station asset LIVESTOCK-2. This was in keeping with Station's policy of making periodic checks of the activities of former, potentially dangerous agents.

It should be noted that it is the Station's opinion that LIFEAT's excellent overall service, plus its ability to provide unilateral coverage of targets of opportunity on short notice (sometimes on as little as two hours notice), make LIFEAT a dependable daily contributor to the fulfilling of the Station's mission.

B. PROCESSING OF TAKE

No change from previous report.

C. LIAISON

During the month of October the two playback recorders used by the ODENVY processor broke down. These were repaired by the LIFEAT technician, David M. WILSTED. ODENVY continued to process take from the LIFEAT/American Communists in Mexico lines.

D. SECURITY

There have been no known adverse security incidents effecting the LIFEAT operation during the reporting period. LIFEAT meeting sites continue to be changed periodically. The fourteen regular and six alternate sites used for daily contact between the Station Case Officer and WILSTED and Wayne C. DRABAND are considered adequate. Numerous meeting sites are used for contacts between WILSTED/DRABAND and the basehouse keepers.

E. TECHNICAL

Audio and dial tape recorders ordered by the Station in support of the LIFEAT operation began to arrive at the end of October. These were placed in immediate service. It is noted that the automatic tape stop on the new model Revere audio recorder has thus far proven to be of no use to the operation.

and on occasion has caused some minor problems. It is believed that these problems are temporary and will be eliminated when WILSTED has time to by-pass this cut off switch.

The new Annex VI (see reference A) was placed in full operation on 23 October and presently provides coverage of four target lines.

F. COVERAGE

During the month of October 1962, LIFEAT covered a total of 25 target lines. Coverage by target was as follows:

1. Soviet Bulletin Office
2. Svyatoslav F. KUZNETSOV
3. Aleksandr G. SIDOROV
4. and 5. Polish Embassy (two lines)
- 6, 7, 8, 9, and 10. Yugoslav Embassy (five lines)
- 11, 12, and 13 BEKNAVE/BECHICK operation
14. Juan Jose AREVALO Bermejo
15. Peter WATKINS
16. AMSTET-1
- 17, and 18. AMSTRUT operation
19. Psychiatrist attending AMSTRUT-2
20. Carlos ILLESCAS
21. Suspected PCM safehouse
22. LIVESTOCK-2
23. Albert (Margaret) MALTZ
24. Charles SMOLIKOFF (aka SMALL)
25. Noah SEBORER

G. PERSONNEL

LIEMBRACE-8 was reintroduced to LIFEAT in order that he may brush up on its daily operation. LIEMBRACE-8 will temporarily replace David M. WILSTED as LIFEAT technician during the latter's home leave December 1962 and January 1963.

Steps were initiated to amend the clearance of LIEMPT-19 for work as a part time LIFEAT processor/translator.

2. During the reporting period, LIFEAT operation provided a total of 62 reels of raw take from ACGM lines to local ODENVY for their processing. In addition, a number of memos were prepared by the Station for passing to local ODACID and ODENVY based wholly or in part on LIFEAT provided material.

1. The following report is submitted in accordance with CSFHB-F 52-6-1, Section V, Paragraph 2 (d) (1).

A. EXPLOITATION OF LEADS

(1) LIFEAT/Soviet In this reporting period LIFEAT provided vital information and live-monitoring support during the installation phase of a successful Station technical operation targeted against Aleksandr G. SIDOROV, Soviet Military Attache in Mexico.

(2) LIFEAT/Cuban This coverage provided valuable operational support during the period leading up to the recruitment of AMSTRUT-2 giving timely advance information of AMSTRUT-2's arrival in Mexico, as well as his day to day activities and contacts. Following AMSTRUT-2's recruitment, LIFEAT gave an excellent account of AMSTRUT-2's activities for those periods he was not under the control of his case officers. This was invaluable proof of his full cooperation with KUBARK and added a safety factor for the case officers making the recruitment and initial handling which would not have been otherwise available.

(3) LIFEAT/Polish and LIFEAT Yugoslav These coverages continue to provide excellent information of the daily activities of the Satellite officials assigned to Mexico. The LIFEAT support of the BEKNAVE/BECHICK operation continues as noted in reference.

(4) LIFEAT/Exile LIFEAT coverage of Juan Jose AREVALO Bermejo provides information and operational leads which, though valuable now, would be invaluable if ODYOKE's policy toward AREVALO becomes sufficiently defined to fully exploit all the information provided by LIFEAT.

SECRET

(5) LIFEAT/American Communists LIFEAT continues to provide information of interest to ODENVY (who initially requested this coverage and processes this take.) Local ODENVY has noted recently that the information concerning travel of American leftists to Mexico and their contacts while here are particularly worth while.

(6) LIFEAT/Miscellaneous LIFEAT coverage was reinstituted on LIVESTOCK-2 in Station periodic check on the activities of this former agent.

B. PROCESSING OF TAKE

No change from previous report (see reference).

C. LIAISON

No change from previous report (see reference).

D. SECURITY

There have been no known adverse security incidents effecting the LIFEAT operation during the reporting period. The "coyote" incident noted in reference, paragraph I.D. is now settled and should pose no further difficulty to this operation.

E. TECHNICAL

No change from previous report (see reference).

F. COVERAGE

During the month of September 1962, LIFEAT covered a total of 16 target lines. Coverage by target was as follows:

1. Soviet Bulletin Office
2. Svyatoslav F. KUZNETSOV
3. Aleksandr G. SIDOROV
4. BECHICK's place of employment.
5. Individual considered for cut out in BEKNAVE/BECHICK operation
6. and 7. Polish Embassy (two lines)
- 8., 9., and 10. Yugoslav Embassy (three lines)
11. Juan Jose AREVALO Bermejo
12. Peter WATKINS
13. LIVESTOCK-2
14. Albert MALTZ
15. Charles SMOLIKOFF (aka SMALL)
16. AMSTRUT Operation

G. PERSONNEL

LIFEUD-24 and LIFEUD-26 obtained a basehouse on 29 September which will take the place of the old Annex VI (closed when LIFEUD-5 and LIFEUD-11 were terminated due to their pending divorce). It has been decided to retain the same annex designation, i.e., Annex VI, since the area of coverage is the same as that provided by the old basehouse.

5 June 1960

MEMORANDUM FOR THE RECORD

SUBJECT: DEBRIEFING OF DAVID M. WILSTED (ps)

1. On 1 June 1960 Mr. John G. Hayn and Mr. John Kennedy of WHD, Mr. Robert Brown of SI/OPS, Mr. Robert Bryant of FI/OPS and Mr. Charles Bray of FI/D met with David M. WILSTED (ps).
2. WILSTED emphasized that the whole telephone system in Mexico City is undergoing a reformation. The company Telefonos de Mexico, S.A., has sub-contracted this work of cleaning up and reorganizing the phone system to the independent firm, Intel. They are cleaning up unused and old lines; putting in new and spare lines, redefining exchange areas, laying underground cables, etc. Eventually we should be better off because there should be more surplus lines. The renovation work has hampered much of the LIFEAT work, principally because many of the lines now are underground and we cannot get access to them before they enter the central. This is particularly true with respect to the Czech Embassy, to whose telephone lines we cannot obtain access from the vantage point we now occupy.
3. WILSTED said that we try to keep track of the activities of "Intel" but since they seem to attack "Colonias" at random, we have no prior warning of their presence in a certain area.
4. In the recent past, Mexico has been using houses for listening posts for security reasons. We have more control over the access of phone company inspectors or repairmen to houses. However, under new regulations, all new apartment buildings must have telephone lines installed in the building by the phone company during the construction phase. This means that the lines and their destination are concealed. WILSTED proposed that this will mean we can again use apartments since we can siphon off a line destined for use by another tenant in such a way that the phone company cannot trace its destination without tearing the building apart and we can then install a separate line to the building and hook up the subscriber to this line which, if checked, will belong to a legitimate subscriber.
5. One system which has been used effectively is to take one-half of two separate pairs which have one faulty line each. These two half pairs then form one good pair which we can use.
6. WILSTED explained that it cost about 3000 pesos to get a regular telephone. This entails the purchase of a telephone company bond, which later can be sold.

~~SECRET~~

~~SECRET~~

7. Personnel involved in the tapping of the lines are:

Rene - who has access to the centrals. He contacts the following men:
Two brothers
Jose - does exchange connections.

8. The take from each basehouse is collected early in the morning before office hours by RAFANELLI. He only enters one basehouse which is occupied by an elderly couple. All other contacts are in automobiles made at different spots each day of the week. RAFANELLI then takes the material to a meeting between him, WILSTED and SECHEN where RAFANELLI turns the material over to SECHEN and they all discuss the problems and plans for the day.

9. According to WILSTED there is no live monitoring done by any of the basehouse keepers.

10. There follows a list of the basehouses and the lines covered at each base:

- a) Calero 39 - formerly covered American consules, now no lines. Being held for future use.
- b) Juancatlan 179 - Cuban residence
Russian Commercial
E. T. (Nicaraguan)
- c) Atlixco 47 - 2 Polish
Seborer
Tropete
Beklar
- d) Tenancingo - Cuban military office
Cuban Ambassador's office
Campos (travel agency)
1 spare
- e) Aristoteles 80 - JAR
Ejercito Nacional 540 (name of person unknown)
- f) Suderman & Horacio - facilities for three lines. Formerly processed the Czech lines. Now nothing but being held open.
- g) Cuautla 131 - 3 Soviet Embassy (tapped in the Central)
1 Soviet propaganda office (tap in box)

<p>Ref : A) HMMA 19641 B) HMMA 19129</p> <p>1. The following report is submitted in accordance with CSHB-F 52-6-1, Section V, paragraph 2 (d) (1).</p> <p>A. <u>Exploitation of Leads</u></p> <p>(1) <u>LIFEAT/SOVIET</u> With the departure of Vladimir G. NOVIKOV during the month of August 1962, it was decided that LIFEAT should pick up coverage of his replacement Svyatoslav F. KUZNETSOV. The continued coverage of Aleksandr G. SIDOROV, which includes extensive periods of live-monitoring and special processing of the take, is considered essential to those Station-assets involved in the attempt to place the technical surveillance noted in last month's report (see reference A). Coverage of the Soviet Bulletin Office continues to provide interesting personality data on Soviet officials assigned to Mexico.</p> <p>(2) <u>LIFEAT/POLISH</u> LIFEAT coverage in support of the BEKNAVE/BECHICK operation continues to be vital to that operation. Additional coverage for this operation has been undertaken, leads from which will probably determine future direction of the operation as well as aid KUBARK in controlling the operation.</p> <p>(3) <u>LIFEAT/YUGOSLAV</u> In this area LIFEAT provided the information that a cousin of a recently assigned KUBARK deep cover agent, Victor W. OBOLD (ps) will be travelling to Mexico in the near future. This cousin is a long-time Communist Party official and a chance meeting with him could have destroyed OBOLD's carefully prepared cover. Due to LIFEAT advanced warning, proper security safeguards have been arranged. LIFEAT has also provided travel information on Yugoslav officials from the United States which was of great interest to ODENVY.</p> <p>(Continued)</p>

(4) LIFEAT/EXILE LIFEAT coverage in this area has been most rewarding in providing leads to the contacts of Juan Jose Arevalo Bermejo, former Guatemalan President. Spanish Republican Exiles were covered for approximately one-half month in August, at which time it was decided that the coverage no longer provided sufficient leads and information to justify continued LIFEAT effort.

(5) LIFEAT/American Communist Group in Mexico (ACGM)
This coverage is at the request of the local office of ODENVY and the processing of take in this area is done by that office. One of the most interesting items provided from this coverage was the fact that the American Communists Albert MALTZ and Margaret Larkin MALTZ had separated and that Albert MALTZ would probably reside in the U.S. with Margaret remaining in Mexico. Concerning the LIFEAT coverage of the ACGM, the local office of ODENVY wrote on 23 August 1962: "This office feels that the coverage mentioned is quite valuable and many useful leads are obtained from this coverage, particularly with regard to travel in and out of Mexico of American Communists who are in contact with individuals on whom coverage is maintained".

B. Processing of Take

No change from that noted in reference A.

C. Liaison

No change from that noted in reference A.

D. Security

During the early part of August 1962 a group of "coyotes" was uncovered in the telephone company in Mexico City and a number of arrests were made. This group had organized a unit including linemen, centralmen, installation crew, warehousemen, and workers in the office responsible for providing service to new clients. It was the purpose of the "coyote" group to provide service, for a price, to those individuals whose requests for installations had been turned down by the telephone company due to limited availability of cables and contacts. (Note: The company generally keeps a certain number of "spare pairs" in each cable for its own use in providing special service, company phones, and for re-routing during repairs to other cables. It was these spare pairs and contacts which the "coyotes" used to provide illegal phone service.) This telephone company within the telephone company would also collect monthly fees from their "subscribers". When the story came out, the telephone company had special police stationed in each central and spot checks made of linemen and crews to prevent recurrence. It was therefore necessary for the LIFEAT linemen to refrain from any clandestine activity for a period of almost four weeks so as not to be accidentally picked up as a member of the "coyote" group. LIFEUD-1 has reported that the situation is now back to normal with the special police details and special checkups terminated. No compromise of the LIFEAT operation resulted from the above incident.

E. Technical

In addition to re-supplying LIFEAT with audio recorders (as reported in reference A), the Station has ordered ten new dial tape recorders for the project. Funds for this purpose were included in the latest Project Renewal Request (forwarded by reference B).

F. Coverage

During the month of August 1962, LIFEAT covered a total of 15 target

INFO												
FROM	Chief of Station, Mexico City											
SUBJECT	LIFEAT Progress Report for July 1962											
ACTION REQUIRED - REFERENCES												

1. The following report is submitted in accordance with CSMB-F 52-6-1, Section V, paragraph 2 (d) (1):

A. Exploitation of Leads

(1) LIFEAT/SOVIET LIFEAT coverage in this area was concentrated on known RIS officers: Vladimir G. NOVIKOV and Aleksandr G. SIDOROV. The most rewarding lead from this coverage during July was that SIDOROV would be absent with his entire family from his apartment for nearly two months, and more importantly, that no one would be continuously watching the apartment during that time. Based on this information, the Station has been able to make the necessary preparations for establishing technical surveillance of this apartment. LIFEAT coverage of the Soviet Bulletin Office, in addition to the above coverages, has provided information on the daily activities of individual Soviet officials assigned to Mexico, including collection of travel and biographical data.

(2) LIFEAT/POLISH LIFEAT coverage has been vital to the BEKNAVE/BECHICK operation. LIFEAT has even provided live-monitoring of an international call to BECHICK from a former admirer. Also in the Polish area, LIFEAT provided names of Polish Embassy contacts who were invited to Polish national holiday celebrations at the Polish Embassy, as well as information concerning the impending arrival of the new Polish Ambassador.

(3) LIFEAT/YUGOSLAV In the Station's increased operations against this target, basic biographical, personnel assignment, and personnel daily activity information is essential. LIFEAT has been providing just this type information since coverage commenced in May.

(4) LIFEAT/EXILE LIFEAT coverage of exile and revolutionary groups has been concentrated on coverage of Central American and Spanish Republican groups and individuals. Coverage of Juan Jose AREVALO Bermejo, former President of Guatemala, has provided the Station with valuable information concerning his contacts and future plans. Further, LIFEAT covered LIGIRD-1's contact with AREVALO and later revealed AREVALO's conviction that the Station asset, LIGIRD-1, is involved in a plot to assassinate AREVALO. Coverage of Spanish Republicans displayed the internal dissensions aroused by the plans of a small group of the Mexico-based exiles to assassinate certain prominent persons with plastic bombs, and ultimately told of the departure from Mexico to Cuba of two individuals implicated in the plot.

(5) LIFEAT/American Communist Group in Mexico (ACGM)
Targets covered in this category are in answer to a long standing requirement laid on by ODENVY and approved by Headquarters. In the past ODENVY has noted the coverage as valuable and worthwhile to them. As in the past, reliable information was provided on the activities, travel, and contacts of the ACGM.

B. Processing of the Take

LIFEAT processors continue to process all take for the LIFEAT operation except for the three ACGM lines which are processed by the local ODENVY office.

C. Liaison

No change.

D. Security

No security incidents directly affecting the operation or future of LIFEAT were noted during July 1962. The assignment of special telephone company crews to make a survey of spare telephone lines available for use of new subscribers may cause problems when these crews uncover a "spare" line used in a LIFEAT coverage. However, since these crews have no authority (or desire) to trace down the lines to their ultimate destination, normal LIFEAT security practices should negate this danger. A second development which could cause future problems is the possible assignment of a LIENVOY technician to check telephone centrals to see exactly who else may be carrying on LIENVOY type work. As of this date LIFEAT personnel, who have been provided with the true name of this individual, have never heard of him working in any central in Mexico City. As of this moment it appears this will not develop into a threat to LIFEAT operations.

E. Technical

New recorders provided in May to LIFEAT are now in operation and appear superior to previous models used. It is planned, with the approval of Project LIFEAT for FY 1963, to completely re-equip LIFEAT with new recorders and possibly dial tape recorders.

F. Coverage

During the month of July 1962, LIFEAT covered a total of 16 target lines. Specifically, the coverage by target was as follows:

1. Soviet Bulletin Office
2. Viadimir G. NOVIKOV

3. Aleksandr G. SIDOROV
4. BECHICK
5. and 6. Polish Embassy (two lines)
7. and 8. Yugoslav Embassy (two lines)
9. Juan Jose AREVALO Bermejo
10. Peter WATKINS
11. Juan Simeon VIDARTE Franco Romero
12. Dr. Eugenio ARAUZ
13. LINEB-1 (one line covered for this double agent operation)
14. Albert MALTZ
15. Noah SEBORER
16. Charles SMOLIKOFF

G. Personnel

Clearance was received on LIFEUD-24 and he will commence work shortly to fill the gap left with the resignation of Olivia N. GLADMON (ps). (See project renewal forwarded HMMA-19129.) A deep-cover agent, OBOLD, was made available to process completely the take from the Yugoslav lines. He is working out well with no evident security danger to either himself or LIFEAT.

2. A. Since submission of the last Project LIFEAT Renewal Request and Project Review, 72 reels of LIFEAT on the American Communist Group in Mexico (ACGM) have been passed to the local office of ODENVY. In addition, a number of memos were prepared by the Station for passing to the local ODACID and ODENVY based in whole or in part on LIFEAT provided material.

B. Despite the fact that LIFEAT is used primarily to support Station operations, some positive intelligence is gathered as a by product of the operation. The following reports were forwarded to Headquarters based on LIFEAT material:

HMM-6421
HMM-6452
HMM-6479
HMM-6499
HMM-6565

3. The Station has applied the RYBAT control to this dispatch to ensure the Desk's control of the information contained herein.

f. Coverage

The number of lines covered by LIFEAT during the reporting period varied greatly due to the moving of two basehouses. However, the number covered averaged 12, with the breakdown as follows:

LIERODE, and related lines	2
LITMUS, and related lines	3
American Communists	3
Local Communists	2
Targets of Opportunity	2

g. Personnel

The assistant outside case officer, Ralph B. RAFANELLI (ps), will depart Mexico City for a new assignment within the next month. David M. WILSTED (ps) will undertake complete outside work for LIFEAT for a temporary period while a locally obtained replacement for RAFANELLI is being cleared and trained.

2a. During the reporting period information from 236 LIFEAT reels on coverage of the American Communists in Mexico was passed to the local office of ODENVY. In addition, numerous memos were prepared by the Station for passing to the local ODACID and ODENVY based on LIFEAT provided material.

b. The following reports were based wholly or in part on LIFEAT material:

The appropriate Case Officer considers the check of penetration agents LITAMIL-3, LITAIN-7, and LITALUS-3 through LIFEAT to be of utmost value in controlling these agents and checking their activities. In addition, LIFEAT provided extremely valuable information in the defection of Jose PARDO Llada, giving leads for both FI and PP exploitation. Aid was also given in providing a check of the AMIRON AWOLS in Mexico. In a related occurrence, LIFEAT provided information that indicates the Cuban Embassy in Mexico is being used as a Guatemalan Communist communication channel to exiles in Cuba. LIFEAT also provided daily information on travelers to Cuba.</p> <p style="margin-left: 80px;">(2) LIFEAT/LITMUS provided information for use in the BECORN operation. It is also of continuing importance as a daily check on the activities of the LITMUS personnel in Mexico.</p> <p style="margin-left: 80px;">(3) During the recent Latin American "Peace Conference", LIFEAT provided information on the delegates to the Conference, especially the U.S. delegates, as well as the activities of the Conference.</p> <p style="margin-left: 80px;">(4) LIFEAT coverage of Noah SEBORER provided advance information on the travel to the United States of Anna SEBORER and Maria and Enos WICHER. The actual departure and return of these American Communists was also confirmed through LIFEAT.</p> <p style="margin-left: 40px;">b. <u>Processing of Material</u></p> <p style="margin-left: 80px;">There has been no change in the processing of the internally produced LIFEAT take. 1. The following report is submitted in accordance with CSMB-F 52-C-1, Section V, paragraph 2 (d)(1):

a. Exploitation of Leads

(1) LIFPAT/LITROBE continued to be an essential check on the activities and veracity of the penetration agents LITALIS-3, LITAMUS-4, LITAMINT-7, and LITAMAIL-3. It also provided daily information on the activities of the Cuban official installation as well as coverage of long-distance calls received by that installation from Havana, Cuba. In relation to the AMCONS AMOLS in Mexico, LIFPAT was able to help confirm that none of the AMOLS contacted the Cuban Embassy. LIFPAT also picked up the return from Cuba of Oscar ROQUIQUEZ Moruna (person who desired employment as a Cuban C-2 agent).

(2) LIFPAT/LITMUS continued to provide the Interested Case Officer with daily information on the activities of the officials of the LITMUS installation in Mexico City.

(3) LIFPAT, through coverage of Xavier GUERRERO Saucedo and his wife, Clara Porcet de GUERRERO, was able to provide information on preparation activities of the recent Latin American Peace Conference held in Mexico City. This line also provided information of GUERRERO's contacts with other Communists, particularly Francis W. and Libby Campbell PARK, Canadian Communists now residing in Mexico.

(4) Coverage of Noah and Anna SPOONER revealed the plans of Anna SPOONER to travel to the U.S., and gave precise itinerary and flight schedule for this travel. LIFPAT was also able to provide the plans and travel schedule on Enos and Maria WICHER's travel to California. This information is of interest to ODINTY and was passed locally to that office.

b. Processing of Material

No change.

c. Liaison

No change.

d. Security

Contractual arrangements for a new basehouse, Annex VIII, have been all but completed. It is believed that this move will once again enable full secure use of the experienced basehouse keepers who were involved in the security question noted in paragraph 1 (a)(d) of Reference. In order to further improve LIFPAT's coverage and security, the Station is also considering a move of Annex I if a suitable new site can be located. Headquarters will be advised of any progress made in this respect.

DISPATCH		DESENSITIZED	10-6-30/3
TO	Chief, WH Division	DESENSITIZED	
FROM	Chief of Station, Mexico City	DATE	3 March 1961
SUBJECT	LIFEAT Report Covering August, September, October, November, December 1960, and January 1961	REASON (CHECK ONE)	<input type="checkbox"/> SAVED FOR INDEXING <input checked="" type="checkbox"/> NO INDEXING REQUIRED <input type="checkbox"/> INDEXING CAN BE JUDGED BY QUALIFIED HQ DESA ONLY
ACTION REQUIRED	Information only		
<p>1. The following report is submitted in accordance with CSMB-F 52-6-1, Section V, paragraph 2 (d)(1):</p> <p style="margin-left: 40px;">a. <u>Exploitation of Leads</u></p> <p style="margin-left: 40px;">(1) LIFEAT/LITERODE, with related lines, provided overall coverage of the local Cuban and exile activities, and was considered extremely valuable in support of Station operations in the Cuban area. LIFEAT coverage of the Cuban Embassy enabled the appropriate Case Officer to check the veracity and activities of the penetrations of that installation; particularly LITANT-3, LITAKS-3, and LITANT-5. It was also invaluable in the debriefing of LICOZE-1. LIFEAT material was the basis of an effective KUBARK inspired press release concerning derogatory activities of Cuban Embassy personnel.</p> <p style="margin-left: 40px;">LIFEAT leads were of special value in two "one-time" operations. The first of these was the ability of LIFEAT to provide advance information on a meeting arranged between RAOJAS VILLA (aka James Bradford STEWART) and a Cuban Embassy official. As a result of the lead time given by LIFEAT, the Station was able to provide surveillance of the meeting and arrange for the detention of RAOJAS. Ultimately, RAOJAS (a fugitive from ODENVY) was returned to ODENVY jurisdiction through Station action. In a second case LIFEAT provided follow-up information which, when provided to ODENVY, lead to the apprehension of Thomas Howard BRIDGES (aka Carl JOHNSON). He, too, had attempted to arrange a meeting with Cuban officials in Mexico, and was under warrant for abduction in Chicago, Illinois.</p> <p style="margin-left: 40px;">LIFEAT information was heavily drawn upon in the case of Guillermo HERNANDEZ Vega, possible Castro agent, who was suspected of penetrating the AMIRON program. Through LIFEAT the Station was able to monitor HERNANDEZ's attempts to contact various Mexican and Cuban officials and to arrange for his return to MADD before any such contacts were made.</p> <p style="margin-left: 40px;">(2) LIFEAT/LITERUS continued to provide daily information on the official Polish installation in Mexico City which is described by the interested Case Officer as "invaluable and unique." During this reporting period, major contribution has been in providing the leads which determined that a local cafe is a front for much Polish intelligence activity in the area. It has been further indicated that this cafe is the Headquarters for a suspected Polish operation directed against the ORACID installation (previously fully reported to KUBARK, KUBECT, and KUBOSE/D in HSA-1581h, HSA-15895, and HSA-16222. The telephone of this cafe has been added to the LIFEAT coverage with resulting increase of Station knowledge of Polish intelligence activity.</p> <p style="margin-left: 40px;">Also of major interest was the LIFEAT support of a Station audio operation against the Polish Embassy in Mexico City. In this, LIFEAT provided the information on delivery date of a KUBARK "bugged" piece of equipment ordered by the Polish Embassy. As a result of the lead time provided, the Station was able to promptly initiate bare house procurement and other support for this operation.</p>

50-6

As a continuing asset, LIFEAT provided daily notice of the activities and movements of Polish officials. In one case LIFEAT provided advance information concerning travel plans of one Jan KRZEWICKI, a person on the Polish Watch list.

(3) During the reporting period LIFEAT added to the security of the Station in checking on present and past agent assets. Of particular note was the coverage of the activities of LIFEAT, LIVESTOCK-1, and LIVESTOCK-2.

(4) Until terminated for security reasons (see SECURITY, below), LIFEAT coverage of the U.A.R. Embassy provided independent check of the activities of the members of that installation. Of note were the LIFEAT revealed meetings between Vicente LOMBARDO Toledano, former Mexican President Lazaro CARDENAS and the previous U.A.R. Ambassador Anouar HATMI. This coverage also provided information concerning the visit of an Algerian rebel delegation to Mexico.

(5) LIFEAT provided coverage of the local Communists, the American Communist Group in Mexico (ACGM), and lately on two important Canadian Communists living in Mexico. In its coverage of local Communists LIFEAT provided coverage of Carmen BRUFAU Civit (admitted former Soviet agent), Xavier GUERRERO Saucedo and his wife, Clara Porcet de GUERRERO, and Juan Luis CAMPOS Villalobos. LIFEAT provided leads indicated the place of employment of BRUFAU, as well as much of her daily routine, thereby allowing the Station to initiate physical surveillance of her. LIFEAT coverage of CAMPOS, of interest to the Station's Communist Party Penetration Program, revealed his insincerity in cooperating with KUBARK, and as a result efforts toward his full recruitment were terminated with minimum danger to Station assets. Recently, at Headquarters request, LIFEAT reinitiated its coverage of the GUERREROS. This coverage has already provided information of the continuing contact between the GUERREROS and Frank and Libby PARK, Canadian Communist "immigrants" to Mexico and members of the Labor Progressive Party (Canadian CP). The Station hopes to mount a more comprehensive coverage of the PARKS as a result of the LIFEAT lead. In the LIFEAT coverage of the ACGM, of particular interest was the advance travel plans of Albert MALTZ, Noah and Anna SEBORER (as well as the travels of their sons Carl and Robert SEBORER), Maria and Enos WICKER, and Grace and Sam NOVICK. Daily activities of the ACGM are provided through LIFEAT to the local office of ODENVY.

(6) The LIFEAT complex provided the security check of the private office telephones of the Chief of Station and Deputy Chief of Station, as well as checks of the home telephones of certain of the Station officers (as reported in LHFA-18465). Since this service is unique and of value to Station security, it will be utilized periodically to guard against hostile audio surveillance.

b. Processing of Material

There has been no change in the processing of the internally produced LIFEAT take. LIFEAT processors continue to process the take from the LIVENVOY/LIMEICK coverage.

c. Liaison

In November 1960, the local office of ODENVY requested that coverage of Albert MALTZ be re-initiated. This was done for a short period. However, due to the start of telephone company cable work in the area of basehouse Annex IV, coverage had to be terminated. Technical surveillance will be resumed when cable work has been completed.

d. Security

Operations at basehouse Annex VIII had to be discontinued on 10 October 1960 when the telephone company's installation crews moved into the area of that basehouse and actually approached the annex to investigate the number of lines entering the house. The crew was put off until the next day with the standard, and normal for Mexico City, excuse that the "Senor" was not at home and they could not enter without his permission. By the time the crew returned on the following day, the basehouse had been completely cleared of all equipment, the lines cut back to the roof-line and their ends treated with acid to give them an aged appearance. The crew was allowed to enter the basehouse to check (and ultimately remove) the extra lines, with the admonition that it was about time they cleaned up that mess on the "Senor's" roof. Operations will be resumed when a suitable new basehouse site has been located and equipment installed. There have been no security repercussions since the removal of the extra lines by the telephone company.

The only other security note was in relation to Annex IV and was covered in LIAISON section above.

f. Coverage

The number of lines covered by LIFEAT during the reporting period has ranged from 2 to 15, but has averaged 12. The normal breakdown of the LIFEAT coverage is as follows:

LIFENODE and related lines.....	3
LITMUS and related lines.....	3
American Communists.....	1
Local Communists.....	2
Targets of Opportunity.....	3

It is hoped that once the telephone company has completed its present city-wide cable and installation work, at least in the areas of the basehouses, LIFEAT will be able to increase its coverage to 15 or 18 lines. The targets for this 3 to 6 line increase are already noted by the Station.

g. Personnel

No change since last report. Headquarters is reminded that the second tour of Ralph B. NAPANELLI (ps) will end in June 1961. It is requested that a qualified replacement be provided from Headquarters.

2. a. During the reporting period, information from one hundred thirty LIFEAT reels on coverage of American Communists in Mexico was passed to the local office of ODEWY for its information.

SUBJECT: LIFEAT Monthly Report, June 1960	RE 433 - REVIEW MARKED FOR INDEXING NO INDEXING REQUIRED INDEXING CAN BE DONE BY QUALIFIED AGENTS		AN <input checked="" type="checkbox"/> AB <input checked="" type="checkbox"/> TS <input type="checkbox"/> FS <input type="checkbox"/> SX <input type="checkbox"/> DES <input checked="" type="checkbox"/> FI <input type="checkbox"/> LCP
ACTION REQUIRED: None. For your information.			
REFERENCES: 1. The following report is submitted in accordance with CSHB-F 52-6-1, Section V, Paragraph 2 (d) (1): a. <u>Exploitation of Leads</u> <p>LIFEAT/LIMERICK continued to provide advance information on arrivals, departures, work assignments, and contacts of the Soviet officials in Mexico City. In this area LIFEAT provided the following: advance travel information on the return of First Secretaries Yevgeniy BOCHKOV and Yuriy ALEKSANDROV from consultations in the USSR, advance information on the arrival in Mexico of the Georgian Ballet on 1 June and its subsequent departure for Cuba on 20 June accompanied by Assistant Cultural Officer Aleksandr BROVKIN, and advance information on the assignment and arrival of new Consular Officer Serafim V. DUNIN. LIFEAT leads provided on the continuing attempts of the Soviets to rent apartments are being checked by the Station surveillance team.</p> <p>LIFEAT/LIERODE continued to provide excellent coverage of the activities of the Cuban Embassy staff, particularly providing exploitable coverage of Cuban intelligence activities. Of major importance during the month of June was the acquisition of leads on the activities of Cuban "tourist" Francisco DELGADO Garcia. As a result of these leads, passed to the Mexican government in disguised form, DELGADO was arrested on the night of 7 July and thereafter deported. LIFEAT information also enabled the responsible Case Officer to alert agent LIMASK to threats made by DELGADO to have LIMASK arrested. The LIERODE related coverage of the telephone of Santiago GARCES Arroyo has enabled the Station to maintain a check on the activities of AMSHAD-1, including his possible role as middle-man in a "frozen pesos for sugar" deal reported in MEXI-5794.</p> <p>LIFEAT/LITMUS provided information on the activities of the Polish Legation during June, particularly noting the travel plans of Polish Intelligence Officer Thadeusz ZIOLKOWSKI.</p> <p>LIFEAT coverage of a member of the Mexican Communist Party (PCM) is used in checking the veracity of Juan Luis CAMPOS Villalobos who is of interest to the Station's Communist Party Penetration Program.</p> <p>LIFEAT also agreed to support Project LIENVOY in the processing of the Soviet take when LIENVOY picked up coverage of the Soviet lines LIFEAT was forced to relinquish on 22 June 1960 (See SECURITY below). LIFEAT, though short of processors, agreed to the processing when it was learned that LIENVOY would be unable to process the added coverage it had undertaken.</p>			
b. <u>Processing of Material</u>		Remove from Project: <u>DISPATCH</u> CS Classification: <u>SECRET</u> J03 # <u>25-73177</u> Box: <u>1</u> Fold: <u>6</u>	
Due to the desire of COS that ZINSMEISTER continue to process the take it obtains from the Soviet lines, LIFEAT processor Carol ZINSMEISTER (ps) will undertake the processing of the take of these lines			

which LIENVOY now provides. This is exactly the work previously done by ZINSMEISTER and the only difference is that tapes are made at a different location. However, this does require close coordination within the Station of these two operations.

A problem which has arisen with the withdrawal of the Soviet coverage from LIFEAT responsibility (see SECURITY below) and the "outage" experienced earlier in June on two of the most productive Soviet lines, is the extreme drop in the production of positive intelligence from LIFEAT coverage. It is hoped that with more intensive exploitation of the coverage still available, plus exploitation of new lines being installed by LIFEAT, that the production of positive intelligence will again measure up to that previously provided by LIFEAT.

c. Liaison

No change other than the closer inter-office liaison with Project LIENVOY due to the above noted LIFEAT processing of LIENVOY take and the increased reel and finished product exchange this entails.

d. Security

On 21 June 1960 LITENSOR suggested to COS that LIENVOY begin operations against the Soviet and Satellite targets in Mexico City. In order not to indicate that the unilateral LIFEAT operation was providing this coverage, it was necessary for COS to agree to this suggestion. So as not to jeopardize LIFEAT operations and personnel, LIFEAT coverage was suspended on the Soviet Embassy and Polish Legation, and the applicable "crosses" were pulled and cleaned. This was accomplished by 1030 on 22 June 1960. Coverage continued on the home of Aleksandr BEKIER, Polish Counselor of Legation, since no security problem seemed to be raised by continued coverage of this line.

e. Technical

The arrival in early June of a portion of the replacement parts requested for LIFEAT use has enabled LIFEAT personnel to perform much needed repair and maintenance work on the aging LIFEAT equipment.

f. Coverage

LIMERICK	5 lines (All pulled 22 June for security reasons)
LITMUS	3 lines (2 pulled 22 June for security reasons)
LIERODE and related lines	5 lines
American Communists	1 line
U. A. R. Embassy	1 line (Initiated 7 June)
Target of Opportunity	1 line

g. Personnel

No change.

2. a. During the month of June 1960, eleven (11) processed reels from LIFEAT coverage of American Communists in Mexico were passed to the local office of ODENVY as well as seventeen (17) reels from ODENVY's processing. Reels from the LIENVOY coverage of American Communist Sam BROOKS continued to be passed to ODENVY as LIFEAT material during the month of June 1960.

b. The following reports, cables, information dispatches and memoranda were based wholly or in part on LIFEAT material during the month of June 1960:

HMM-4983 (via MEXI-5655)	HMMA-15088	MEXI-5710
HMM-4990 (via MEXI-5686)	HMMA-15116	MEXI-5745

REF: HMMA-15170, RYBAT-1402

On the evening of 18 June COS met with LITENSOR at the home of LIELEGANT (see MEXI-5761). Among other subjects discussed, LITENSOR urgently suggested that COS arrange coverage of the Soviet/Satellite installations. Since this coverage is obviously one of great interest to KUBARK, COS was left with no alternative but to enthusiastically accept LITENSOR's suggestion. LIELEGANT was equally enthusiastic about the suggestion and requested COS to furnish a list of target lines as soon as possible. On 21 June Malcolm Q. EDELAND passed to LIENVOY/2 a list of 4 Soviet, 2 Polish, 2 Czech and 2 Yugoslav lines. The Polish, the Czech, Yugoslav and 1 Soviet line were placed within two days. Meanwhile all LIFEAT Soviet/Satellite lines were removed. After due consideration it was decided to advise LIENVOY/2 that we would prefer to drop the 2 Polish lines and at least one Yugoslav line and use all remaining available lines (LIENVOY can handle a maximum of 30 lines, always keeping two spares) to cover a total of five Soviet lines and keeping the two Czech lines already in operation. This was agreed to but the four additional Soviet lines could not be placed immediately due to the temporary absence from the city of LIENVOY/3 whose aid was needed to fulfill this assignment.

The eventuality of a request from high Mexican officials for LIENVOY coverage of Soviet/Satellite with its attendant affect upon LIFEAT had been foreseen by the Station for sometime. On at least two previous occasions when a hint was made to COS by lesser officials than LITENSOR, COS was able to dissuade these officials on the basis of lack of qualified personnel for processing, transcribing, and exploiting the take that would come from taps against Soviet/Satellite installations. However, on the above occasion when LITENSOR even went so far as to suggest that the translations could be handled by language experts at Headquarters COS was in no position to argue this point with LITENSOR. The actual implementation of the change over of Soviet/Satellite coverage from LIFEAT to LIENVOY (LIFEAT went back on Polish Legation in late June) was accomplished smoothly, with no flaps and the Station does not envision any problems, certainly, in the immediate future.

The processing and transcribing is being handled in exactly the same fashion as before i. e., LIENVOY is doing the taps only, LIFEAT personnel are processing the tapes from LIENVOY. As far as the Mexicans are concerned, the tapes are being forwarded to Headquarters for processing with the transcriptions being sent back to the Station for our information. The Station has promised LIENVOY/2 and LIELEGANT a monthly summary of any interesting highlights that appear in these transcriptions.

file
Lienoy/ops
2(2)

Between the dates 9 to 14 June during the visit of DORTICOS, LIENVOY covered 10 of the 20 lines of the Del Prado Hotel where the DORTICOS party was staying. This coverage was for 24 hours daily and the LIENVOY personnel monitored all calls coming to and going from the DORTICOS suite (see MEXI-5731). This service was requested by the Station the day before DORTICOS arrival in Mexico City and was readily agreed to and immediately put into effect thru the efforts of LIENVOY/2. Considerable information of interest and value was obtained from this operation as well as quantities of operational data.

Also, during the month of June LIENVOY/9 was dispatched to Cuba on a special assignment per HMMW-5766. LIENVOY/9 successfully accomplished his mission, returning on 6 July. The results from this mission will be forwarded to Headquarters in a separate dispatch.

1. There follows the third monthly activities report on LIENVOY covering the month of June 1960:

A. Exploitation of Material Obtained

During the month of June a total of 29 lines were in operation against the following targets:

1. Gral. Lazaro Cardenas del Rio
2. Sam Brooks
3. Gral. Lazaro Cardenas Del Rio
4. Lic. Alonso Aguilar Monteverde
5. CTAL
6. Ing. Jorge L. Tamayo

Plus 10 lines - Hotel Del Prado - DORTICOS suite 9-14 June
(see MEXI-5731)

B. Processing of Material

With the closing of Unit C (see HMMMA-15200) the two processors retained under the project, LIENVOY/6 and LIENVOY/7

were transferred to the Intercept Center where they are now responsible for doing the full transcription of the tapes covering lines of interest to KUBARK.

C. Liaison

During the month of June COS was in contact with LIELEGANT on the average of four times each week. As stated in paragraph one above, COS met with LITENSOR on 18 June.

D. Security

It is believed that the security of the project has been improved with the closing of Unit C and the elimination of all Unit C personnel with the exception of LIENVOY/6 and 7 who were transferred to the Intercept Site. During the absence of Arnold F. AREHART, Malcolm Q. EDELAND was in direct contact with LIENVOY/2 and took advantage of this contact to repeatedly stress the necessity for tight security of this operation as well as personal security of the various LIENVOYs. For operational efficiency, contact once a week will be maintained between LIENVOY/2 and EDELAND.

E. Technical

Early in June AREHART returned to Headquarters to convert to Staff Agent and pick up his family to return Pcs Mexico City. He and his family arrived 24 June. AREHART reported on his return that some of the equipment was in need of attention but that there were no technical problems during his absence.

F. Personnel

With the elimination of Unit C the following personnel were terminated during the month of June:

LITABLE/2
LITABLE/3
LITABLE/4
LIENVOY/13

G. Production

The following fifty-seven (57) reports, cables and information dispatches were based wholly or in part on LIENVOY during the month of June 1960.

AMMA-15325

Subject: Douglas C. NISLEY's 90 Report for June 1960

13 July 1960

1. During July the LIENVOY project put taps on the telephones of the Czech and Yugoslav Embassies. Anticipating a possible LIENVOY tap on the Polish Legation, the LIPEAT project removed its tap on this installation lest it be discovered by LIENVOY. The Station now receives Czech and Yugoslav roots every day from LIENVOY. The LIPEAT tap on Alexander BEKIER's line continues, a tap on Stanislaw ADAMOWICZ has just begun to produce, and a tap on the Polish Commercial Office is under consideration. Eventually, when the Station is confident that the LIENVOY project will not tap the Polish Legation lines, the LIPEAT project will be able to reestablish its coverage of this target.
2. A daily flow of photographs is coming from Richard Z. SPATHAR (p) to the LIHABIT/2 installation. The Station now has possession of the LIHABIT/2 basephone, but for various reasons it will not be useable for a while, and consideration is being given again to using LIHABIT/1 as a base for photographic surveillance of the Polish Legation. No photographic site is available, or under consideration, for the Yugoslav Embassy.
3. As of 30 June, then, the situation is as follows:
 - a. Czech Embassy: Daily photographic and telephone coverage, augmented by a considerable quantity of information from LIPIRE air passenger manifests, visa requests submitted to the U.S. Embassy, and LIMAT mail intercepts.
 - b. Polish Legation: No photographic coverage. Telephone coverage limited to the taps on the BEKIER and ADAMOWICZ lines. Relatively slight information from visa requests, since there are fewer Poles than Czechs in Mexico City, and also because the Poles are apparently unable to take home leave. Little information from LIPIRE air passenger manifests, for the same reasons. Rather more information from LIMAT.
 - c. Yugoslav Embassy: Telephone but no photographic coverage. Very little information from visa requests or from LIPIRE. LIMAT is a good source of information, but mostly on commercial topics.
 - d. Other EE Targets: No information worth mentioning, because of the lack of any other diplomatic installations. LIPIRE submits occasional reports on the arrival and departure of individual EE satellite personalities.

Secret

4. Processing the source material listed above absorbs a large part of NISLEY's time. LIBRIFORM handles the translation of the Czech material, and BESMOOTH of the Polish material. There is no translator for the Yugoslav mail and telephone intercepts. NISLEY listens to the Spanish conversations on the Yugoslav reels, and attempts an occasional translation of the more interesting bits of Serbo-Croat correspondence with the aid of the dictionary kindly supplied by Headquarters. NISLEY meets BESMOOTH every day to pick up the Polish translations. LIBRIFORM and SPATHAR are still being met daily by Harvey P. DENENHOLZ (p), after his PCS departure in July this will become NISLEY's responsibility, as will the handling of LIMITATIONS 4 and 5, LIPELOOD, LINILE and LIBALSA.

5. Beside the daily scanning of source material, one of the month's more important activities was the updating of the table of organization of the Czech Embassy. This has now been completed. Photographs of departed Czech personnel were forwarded to Headquarters in HMMA-15081, 15106, and 15120. Of the sixty Czechs (including wives, but not children) known to be stationed in Mexico City, photographs are lacking for twenty. SPATHAR has photographed about the same number of unidentified people repeatedly entering the Czech Embassy; copies of these photos are being given to the LEMBRACE surveillance team, and it is expected that one by one these people will be followed home and identified.

6. The Polish table of organization had already been determined, with the possible exception of one newcomer to the Polish Commercial Office who has not yet been completely identified, and there were no changes during the month. It is believed that most of the Yugoslavs have been identified.

7. The process of accumulating information on Czech personnel has not yet gone far enough for the Station to pick one or two likely targets for concentrated attention. A newcomer, positively identified as a Czech intelligence officer, arrived on 30 June and will naturally receive all possible coverage. The Station received a proposal from Headquarters for special attention to be paid to Jaroslav VALENTA, the Commercial Attache; unfortunately, VALENTA had just departed on home leave, so action is being deferred until his return in August.

8. Among the Poles, concentrated attention is being paid to Aleksander BEKIER and Stanislaw ADAMOWICZ by means of telephone taps. The newly arrived Polish intelligence officer will, if technically possible, receive the same coverage as soon as his permanent address is determined, although this will probably mean dropping the BEKIER line. Physical surveillance was run on Tadeusz ZIOLKOWSKI and Henryk POTASZ during the month, the former being

an identified and the latter a suspected intelligence officer; in both cases the surveillance was dropped after the subject showed signs of becoming tall conscious. The ZIOLKOWSKI surveillance lasted several days and revealed a number of possible IS contacts which are now being followed up. The POTASZ surveillance was ~~dropped~~ practically immediately.

9. File studies have now been completed and Target Personality Data Forms executed on all Poles except the custodial personnel, Henryk POTASZ (whose form is in the process of completion), and the three newcomers about whom little is yet known. As a result of this activity, Roman CZYZYCKI and Mieczyslaw WLODAREK have tentatively been selected as worthy of closer concentration, the former on a long-term basis and the latter on a short-term basis. CZYZYCKI is interesting because he is ambitious and apparently not intellectually committed to the regime, he is the close assistant of Aleksander BEKIER and hence has access to information of value, his entire family is with him, and he is young enough to be able to make a new life for himself if flight should become necessary. Attempts are now being made to develop a contact to him through one of his many acquaintances in the Mexican press.

10. WLODAREK is interesting mainly because he is Minister, and because he seems to be disaffected with his prospects. HMMA-13177 of 17 June transmitted information about a possible avenue of approach to him. Information received more recently disclosed that the doctor, who had been tentatively spotted as a means of access to Mrs. WLODAREK, is indeed anti-Communist but is also on unfriendly terms with Mrs. WLODAREK. ODACID personnel, who had been asked to cultivate WLODAREK at diplomatic functions, have reported that WLODAREK has not attended any at which they have been present. No likelihood is now foreseen of any means of contact to WLODAREK, and indications are that his recall may take place some time this summer.

11. An attempt early in June to recruit a source close to Tadeusz ZIOLKOWSKI failed when it was discovered that the individual did not have the access she had been believed to have. Details were sent to Headquarters in HMMA-15116 of 8 June.

12. Information on a possible source of operational intelligence on Czech personnel was obtained from LIKAYAK/2 and forwarded to Headquarters in HMMA-15082 of 3 June and HMMA-15199 of 22 June. The mail intercept on the Czech accommodation address has begun to function, but so far has produced nothing of value.

13. MEXI-5633 of 6 June and HMMA-15195 of 17 June transmitted information from and about BEFUNNY obtained from LIFEERLOOD.

1. The following report is submitted in accordance with CSHB-F 52-6-1, section V, paragraph 2 (d) (1):

a. Exploitation of Leads

During the month of May 1960, Project LIFEAT continued to provide excellent coverage of the activities of the official Soviet and Cuban installations in Mexico City, the Station's top priority targets. The following are specific, though necessarily selective, contributions made by LIFEAT through provision of exploitable leads and support to Mexico City Station.

1) The most outstanding single contribution of the LIMERICK phase of Project LIFEAT during the period of this monthly review was the providing of information to the responsible Case Officer which confirmed the validity of agent LITARDY-1. This double agent turned himself into ODENVY, and thus to KUBARK, during the latter part of the review period. LIFEAT/LIMERICK provided data on the activities and Soviet contacts of LITARDY-1, thus enabling the case officer to adequately plan productive use of this new asset.

2) LIMERICK continued to provide Project LIMESA with support in the form of information on goods and services provided to the Soviets from the local economy. Of special interest was information on specific apartments which the Soviets were considering renting. LIMERICK also continued to provide valuable information on Soviet commercial activities which has been reported separately.

3) Also provided was information of a CE nature concerning specific assignments of personnel within the Soviet Embassy, advance travel plans of Soviet officials, and arrivals, departures, and addresses of Embassy staff members. The following are examples of this category of information:

a) Vitaliy Borisovich SHUBIN arrived 11 May 1960 and is probably the Intelligence Officer replacement for Yevgeniy LAPSHEV. The address of SHUBIN was also provided by LIFEAT.

b) Aleksandr BROVKIN was assigned duties as Assistant Cultural Officer to replace Vladimir NOVIKOV during the latter's home leave.

c) Valentin BAKULIN was appointed Soviet Film Officer in charge of distribution of Soviet films, including propaganda films.

d) Advance notice was given of the 20 May arrival of the Soviet delegation to the International Cotton Conference held in Mexico City, and noted that the delegation would be composed of Dmitriy MAITOV, Boris FIRSOV, Abdulla SULTANKHODZKAYEV, and Vladilyena TERESHCHINA.
