e) Advance information was provided on the following travel: Soviet Ambassador 3AZYKIN to leave 21 June 1960 for home leave in the USSR; planned departure of Vladimir NOVIKOV, Cultural Officer, for home leave in the USSR and return to Mexico; departure for home leave 31 May 1960 of known RIS officer Colone! Dmitriy KUZNETSOV; that thirteen Soviet officials are returning to the USSR during the months of July and August 1960 with no indication that these are to be replaced (Five of these are known RIS officers; Yuriy CHELPANOV; Pavel KOVALEV, Yevgeniy LAPSHEV, Vladimir MAKOVKIN, and Grigori YEFREMOV).

- 4) Due to advance information provided through LIFEAT/LITMUS, the Station was able to cover a claudestine meeting of Alexandr BEKIER, Polish Counselor of Legation in Mexico, and provide identification of BEKIER's contact. Through coordination with MKCHARITY and the Station's KURIOT representative, both audio and photo surveillance of the meeting were arranged.
- 5) LIFEAT/LIERODE significantly supported the Station's efforts in the Cuban operations field by providing leads that lead to and assisted in the recruitment of agent LITALUS-3, a penetration of the Cuban Embassy who is to be handled by LITALUS-1. LIERODE is also utilized as a continuing check on the activities of the newly recruited agent.
- 6) The Station's CE priority has been supported through coverage of the phone used by PCM members Juan Luis CAMPOS Villalobos and Mario PEREZ Marin. This coverage has provided information of value concerning addresses, phone numbers, and contacts of other PCM members. It has also been employed as a cross-check of statements made by CAMPOS to Howard O. MOSCHIANO.
- 7) LIFEAT provided information on travel planned and accomplished by associates of the American Communist Group in Mexico (ACGM) particularly that of Maria WICHER to Moscow, the return of Albert MALTZ to Mexico, and the planned travel of Noah SEBORER to Moscow in August.

### b. Processing of Material

During the month of May 1960, the quantity of raw information processed was noticeably reduced, and thus the amount of positive intelligence derived was also reduced, due to the "outage" on certain of the most productive LIFEAT lines. Principally involved were the Soviet lines, including one week break on an Embassy line, three weeks on the Soviet Motion Picture Office line, and one week on the Soviet Commercial Office line. These "outages" were primarily due to the telephone company pulling the LIFEAT crosses, or the target telephone being out of order.

#### c. Llaison

As in the past, the only liaison connected with Project LIFEAT is in passing reels from coverage of the American Communists in Mexico to ODENVY for their processing. No other liaison is considered necessary or desireable.

#### d. Security

No security problems arose that were not readily solved by the personnel concerned, nor did these jeopardize the operation.

#### e. Technical

The only technical problems encountered were those falling within the province of the telephone company, as noted in 1,0 above, or the normal malfunctions encountered in the aging LIFEAT equipment. These list were repaired as rapidly as possible with the aid of the replacement parts recently forwarded by Headquarters. No major "outages" were due to LIFEAT originated technical problems.

#### f. Coverage

LIMERICK	5 lines (outages as noted in I, b above)
LITMUS LIERODE and related lines	3 lines 5 lines
American Communists	1 line
Targets of Opportunity	2 lines

#### g. Personnel

David M. WILSTED (ps) departed Mexico City on 2! May 1960 for home leave and Headquarters consultation of approximately two months duration. His duties as outside Case Officer and principal technician have been undertaken by Ralph B. RAFANELLI (ps) and LIFEUD-3.

- 2. a. During the month of May 1950, information from twenty-three LIFEAT reels on coverage of American Communists in Mexico were passed to the local ODENVY office for its information. During the period 10 May through 16 June LIFEAT processed this take as the ODENVY processor was on home leave. Twenty-six reels of LIENVOY coverage of Sam Brooks were also passed to the local ODENVY office under the guise of LIFEAT material.
- b. The following reports, cables, information dispatches, and memoranda were based wholly or in part on LIFEAT material during May 1960:

HMM-4921	HMMA-14942	MEXI-5662
HMM-4924	HMMA-14950	MEXI-5615
HMM-4943	HMMA-14956	MEXI-5593

LIFEAT

- l. During my recent visit to Mexico I had a good chance to go over many of the ins-and-outs of this project with the Case Officer and with other officers in the Station. At Station staff meeting I stated that reporting on CI material derived from the project was inadequate and COS appeared to go along with this view. The concensus I got from the Case Officers was that the SE Case Officer is not sufficiently alert to the need for reporting on the CI aspects of the matter and is limiting himself to strictly servicing SR Division matters. Various Case Officers cited instances to me of conversations pointing to new clandestine relationships or containing previously known clandestine relationships in the Soviet field which have not been reported. Owing to a lack of time, I was unable to examine the records myself, but I am inclined to accept these statements as true.
- 2. The Case Officer gave me a general run-down of the situation of the agents on this project and it appears that everything is running very well. He told me that in his new project outline, which will be up in a week or two, he is including some raises to some of the agents. He told me that on his last round of pay raises he had some difficulty here at headquarters. If any difficulty seems forthcoming this time, I should like to have the matter brought to my attention because, as you know, I feel very strongly on this matter and fought the same battles with headquarters for at least five years.
- 3. In speaking with the Case Officers on the Cuban side, as well as on the CI, it was apparent that LIFFAT remains probably the biggest single source of information available to the Mexico City Station and that every effort should be made to continue its smooth functioning. If this means a couple of hundred pesos increase to each agent semi-annually or annually, it does not seem to be too much of a strain and I do not see why we should have any trouble. When I compare the salaries of the base operators and processors on this project, especially considering the illegal position they are in, with those of relatively unproductive agents elsewhere in Mexico and in many other Stations, I cannot help but feel that we are buying a great deal for our money in this project.

CHARLES W. ANDERSON WH/FI

cc: CI/OPS/WH (Mr. Brown)

6 June 1060

MEMORANDUM FOR THE RECORD

SUBJECT: DEBRIEFING OF CAVID M. WILSTED (ps)

- 1. On 1 June 1960 Mr. John G. Heyn and Mr. John Kennedy of WHD, Mr. Robert Brown of CI/OPS, Mr. Robert Bryant of FI/OPS and Mr. Charles Bray of FI/D met with David M. WILSTED (ps).
- 2. WHISTED emphasized that the whole telephone system in Mexico City is undergoing a reformation. The company Telefonos do Mexico, S.A., has sub-contracted this work of cleaning up and reorganizing the phone system to the independent firm, Intel. They are cleaning up unused and old lines, putting in new and spare lines, redefining exchange areas, laying underground cables, etc. Eventually we should be better off because there should be more surplus lines. The renovation work has hampered much of the LIFEAT work, principally because many of the lines now are underground and we cannot get access to them before they enter the central. This is particularly true with respect to the Czech Embassy, to whose telephone lines we cannot obtain access from the vantage point we now occupy.
- 3. WIISTED said that we try to keep track of the activities of "Intel" but since they seem to attack "Colonias" at random, we have no prior warning of their presence in a certain area.
- posts for security reasons. We have more control over the access of phone company inspectors or repairman to houses. However, under new regulations, all new apartment buildings must have telephone lines installed in the building by the phone company during the construction phase. This means that the lines and their destination are concealed. WIISTED proposed that this will mean we can again use apartments since we can siphon off a line destined for use by another tenant in such a way that the phone company carnot trace its destination without tearing the building apart and we can then install a separate line to the building and hook up the subscriber to this line which, if checked, will belong to a legitimate subscriber.
- 5. One system which has been used effectively is to take one-half of two separate pairs which have one faulty line each. These two half pairs then form one good pair which we can use.
- 6. WHISTED explained that it cost about 3000 persons to get a regular telephone. This entails the purchase of a telephone company bond, which later can be sold.

SECRET

Personnel involved in the tapping of the lines are:

Reme - who has access to the centrals. He contacts the following ment

Two brothers

Jose - does exchange connections.

- 8. The take from each basehouse is collected early in the morning before affix hours by RAFANELLI. He only enters one basehouse which is occupied by an elderly couple. All other contacts are in automobiles made at different spots each day of the week. RAYANELLI then takes the material to a meeting between him, WILSTED and SECHEN where RAFANGLLI turns the material over to SECHEN and they all discuss the problems and plans for the day.
- 9. According to WILSTED there is no live monitoring done by any of the basehouse keepers.
- 10. There follows a list of the basehouses and the lines covered at each base:
  - a) Calero 39 - formerly covered American commiss, now no lines. Being held for future use.
  - **b**) Juanacatlan 179 - Cuban residence Russian Commorcial E. T. (Nicaraguan)
  - 2 Polish Atlixco 47 Seborer Tropete Bekier
  - ~ d) Tensnzingo - Cuban military office Cuban Ambassador's office Campos (travel agency) 1 spare
    - Aristotales 30 -UAR Ejercito Nacional 50 (name of person unknown)
    - Suderman & Horacio facilities for three lines. Formerly, I) processed the Czech Lines. Now nothing but being held open.
    - 3 Soviet Embassy (tapped in the Central) 3) Cuautla 131 1 Soviet propaganda office (tap in box)

THE THE TAX OF THE PARTY OF THE

contacts, Mony DESWAAN, over the latter's failure to pay the Soviets for two shipments of Russian farm tractors for which DESWAAN has received payment from the Mexican Government, the ultimate purchaser. LIFEAT indicates DESWAAN has made himself unavailable to the Soviets since two of his checks have "bounced" for lacks of funds. LIFEAT further noted that the Soviets are concerned over reports that DESWAAN is planning an early summer trip to Europe with his entire family.

LIMERICK provided valuable support to the Station's AEIMPULSE operation by furnishing detailed information on the DeSwaan and Esteve Brothers commercial dealings with the Soviets. It was also employed as a security device after the conclusion of the above operation.

Leads were provided on two properties of interest to the Soviets, Calle Mazatlan #208 and Calle Chilpancingo #13, which were a valuable contribution to the LIMESA Project.

- II) LIFEAT/LITMUS was the source of information on the arrival in and departure from Mexico City of Polish officials Jozef WINEWICZ, former Polish Ambassador to Washington, and Boleslaw JELEN.
- III) LIFEAT/LIERODE continued to provide excellent operational leads concerning Cuban and extle operations. Of particular note was the ability of Station Mexico to warn an ODACID officer of a possible "walk-in" provocation attempt by an agent of the Cuban Embassy. LIERODE also provided information on four American citizens who entered Mexico on their way to Honduras to join an anti-Somoza revolutionary attempt.

### b. Processing of Material

Although the LIFEAT project must be considered primarily a Station support project, an effort to further exploit LIFEAT for positive intelligence has been made by assigning the assistant case officer the task of coordinating the efforts of the appropriate area case officers and the Station reports officer in matters concerning LIFEAT produced information. Although this system has been tested only during the month of April, it is hoped that it will prove of value in increasing the positive intelligence take from LIFEAT provided material.

No change was made in the manner of processing the raw LIFEAT reels during the month of April.

#### c. Liaison

As in the past, the only liaison connected with Project LIFEAT is in passing reels from coverage of the American Communists in Mexico to ODENVY for their processing. No other liaison is considered necessary or desireable.

### d. Security

LIFEAT/LIVERY continued to remain out of operation due to the extensive telephone company installation and renovation work being carried on in the vicinity of the LIVERY basehouse. No definite date can be given for the completion of the telephone company work.

#### e. Technical

No change.

- 2. a. During the month of April 1960, twenty-two (22) reels were passed to the local ODENVY office from LIFEAT coverage of American Communists in Mexico. Reels from the LIENVOY coverage of American Communist Sam BROOKS continued to be passed to ODENVY as LIFEAT material until 12 April at which time LIENVOY coverage of BROOKS was discontinued.
- b. The following reports, cables, information dispatches, and memoranda were based wholly or in part on LIFEAT material during the month of April 1960:

| HMM-4855 | HMMA-14762      | MEXI-5373 |

LIMERICK provided the identitites of several contacts of RIS officer, Alexander PRIKHODKO. This coverage also revealed the possible sale of property located near the Soviet Embassy to the Soviets. LIMERICK further provided coverage of the activities of suspect RIS agent, Gabriel UKAEGBU. LIMERICK also provided support for the AEIMPULSE operation.

LIFEAT continued to be employed as a protective security aid in connection with the dismissal of LIVESTOCK-2.

LIERODE has provided an independent check on agent LITANGO-1, and coverage of Cuban intelligence operations. LIERODE also provided a lead on Santiago GARCES Arroyo, who is to establish a Cuban secret service.

### c. Liaison

No change

### d. Security

LIVERY continued to be out of operation due to telephone company renovation work in the vicinity of the LIVERY base house.

#### e. Technical

No new developments.

## f. Personnel and Administration

Jeremy L. NIARCOS (p) reported to Mexico City Station to replace Gene F. BRADDOCK (p) as assistant case officer in the LIFEAT operation.

| 1. The following report is submitted in accordance with FN 52-670 paragraph 3(c)(2);  A. Processing of Information  No changes have been made in the manner of processing LI material.  B. Exploitation of Leads  LINENICK provided information for Station action and also through live-contoring gave protection to personnel involved in the activity with the LUNIK.  LIFEAT is still being used as a protective security measure in connection with the dismissal of LIVESTONAL.  LIERODE has revealed the identities of Cuban agents on the outside, i.e., in an unofficial position.  LIVERY provided the CO with information used in the EXACTIN Operation. (HEM-A-LIMIT, RYMAT-1300, 13 Jan. 1950.)  C. Liaison  No change.  D. Security  No problems encountered which have not been readily resolved by the parsonnel involved.  E. Technical  Nothing new to report.  F. Personnel and Administrative  No change.  G. Miscellaneous  During December 1959 the following lines were in operation LIDENICK  LIDENICK  S lines  LIDENICK  S lines  LIDENICK  LIDENICK  S lines  LIPENICK  LIDENICK  S lines  LIPENICK  LIDENICK  S lines  LIPENICK  LIPENICK  LIPENICK  S lines  LIPENICK  LIPENICK  LIPENICK  LIPENICK  S lines  LIPENICK  LIPENICK  LIPENICK  S lines  LIPENICK  | Information only                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |               | INDEXING CAN BE JUDGED<br>BY GUALA SO NO DESK ONLY |
| A. Processing of Information  No changes have been made in the manner of processing II material.  B. Exploitation of Leads  LINENCE provided information for Station action and also through live-monitoring gave protection to personnel involved in the activity with the IMIK.  LIFEAT is still being used as a protective security measure in connection with the dismissal of LIVENON-2.  LIENODE has revealed the identities of Cuban agents on the outside, i.e., in an unofficial position.  LIVENY provided the CO with information used in the KACHTIN Operation. (HEM-A-IMB17, RYMAT-1300, 13 Jan. 1950.)  C. Liaison  No change.  D. Security  No problems encountered which have not been readily resolved by the personnel involved.  E. Technical  Nothing new to report.  F. Personnel and Administrative  No change.  G. Miccellaneous  During December 1959 the following lines were in operation LIMENICK  5 lines LITENICK  5 lines LITENICE L |                                     | . 1959                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | •             | 4                                                  |

DISPATCH

#### 20 September 1972

MEMORANDUM FOR: Chief, Western Hemisphere Division
SUBJECT: Termination of Project KDAFGHAN

- 1. Project NDAFGHAN, approved for FY 72 and FY 73 in the amount of \$11,950 each year, covered Mexico City Station's observation post targetted against the Cuban Embassy and Consulate in Mexico. OP operators KDAFGHAN-1 and his dependent mother KDAFGHAN-2, Cuban exiles resident in Mexico since 1960, were the only human assets in the project.
- 2. As a result of the JMYAK damage assessment and other security considerations it was decided that the project should be terminated and the agents resettled in another country.

  DIRECTOR 285255 amended the project for FY 72 to a total of \$20,950 to provide for the termination and resettlement of the agents. The agents were terminated in August 72 and are now being resettled in Spain. DIRECTOR 300167 concurred in terminating the project as of 31 August 72.
- 3. In view of the developments in paragraph 2, above, WH/FI recommends approval of this termination request.

Robert D. Wiecha

MEMORANDUM FOR: Chief, Western Hemisphere Division

SUBJECT

Project KDAFGHAN Termination

A request for termination action is contained in paragraph four, herein.

- 2. Project KDAFGHAN is a support project which provides the Mexico City Station with fixed photographic and physical surveillance of the Cuban Embassy and Consulate in Mexico City. The objectives of the project are to furnish photographic coverage of the Cuban installation during daylight hours, to assist the Station in compiling dossiers on officials of the installation, and to fulfill various requirements in support of other Station Cuban operations. The KDAFGHAN project encompasses two assets, KDAFGHAN-1 and KDAFGHAN-2, who have been associated with the project since 1962.
- 3. While this project may be of some value to the FBI (FBI compares KDAFGHAN photographs with the photographs of known leaders of extremist groups in the U.S. as well as with photographs of persons who are subjects of identification orders prepared on badly wanted fugitives in the U.S.), it is of little value, as presently constituted, to Mexico City Station. There are other means of obtaining photographs of PCS and TDY Cuban personnel.
- 4. In early 1972 the Station mounted a thorough CI review of all Cuban operations in an attempt to improve their overall security. Although KDAFGHAN-1 passed the SGSWIRL with no apparent deception, his Cuban exile status, the long period of time he has been operating his OP site in close proximity to the Cuban Embassy, and the potential (perhaps immediate) danger presented by his and KDAFGHAN-2's Cuban relatives made

it clear that the agents should be terminated. In view of the aforementioned, as well as security considerations in the JNYAK case, NH/1 requests approval to terminate this project effective 31 July 1972. In order to meet termination commitments, in the amount of \$9,000, increasing the project's authorization were terminated on 1 August 1972. KDAFGHAN-1 and KDAFGHAN-2 dents during the termination.

## SECRET

KDAFGHAN - Mexico City, Mexico - FI/CI Support Project Targetted Against the Cuban Embassy in Mexico City. FY 1972 Cost: \$11,950. FY 1972 Cost: \$11,950.

#### KDAFGHAN Project Finance History

| w.      | APPROVED | OBLIGATED |  |  |
|---------|----------|-----------|--|--|
| FY 1970 | \$11,165 | \$11,165  |  |  |
| FY 1971 | \$11,094 | \$11,094  |  |  |

#### Purpose

KDAFGHAN is a support project which provides the Mexico City Station with fixed photographic and physical surveillance of the Cuban Embassy and Consulate in Mexico City. The objectives of the project are to furnish photographic coverage of the Cuban installation during daylight hours, to assist the Station in compiling dossiers on officials of the installation and to fulfill various requirements in support of other Station Cuban operations.

#### Description

The KDAFGHAN Project continues to encompass two assets, KDAFGHAN-1 and KDAFGHAN-2, who have been associated with the project since 1962. Both agents continue to furnish information on a timely basis on the personalities and activities of the Cuban target. A description of the individual assets is set forth below:

a. KDAFGHAN-1 (201-288248): A Cuban lawyer in exile in Mexico who left Cuba in 1960. He has been the principal agent of the KDAFGHAN Project since 1962. KDAFGHAN-1's cover is that of a translator and would-be writer. Family holdings from his deceased father also provide financial backstopping. All photographic coverage of the main Embassy gate through final printing and mounting is processed by KDAFGHAN-1.

b. KDAFGHAN-2 (201-305604): KDAFGHAN-2 is the mother of KDAFGHAN-1. Her cover is that of a dependent mother. KDAFGHAN-2 acts as KDAFGHAN-1's assistant and fill-in whenever he is away from the basehouse.

## Changes

The only major change during the project year was the installation of a TV monitor/robot camera combination during October 1970, the month designated as "Cuban month." This added coverage contributed to the compilation of target studies on several Cuban officials. These studies will be used as a starting point for future operations, namely the recruitment/defection of these officials.

# Accomplishments

- 1. The main value of the production of the KRAFGHAN Project has been in establishing the pattern of various Cuban Embassy employees. The monitoring has also revealed which automobiles the various employees usually drive. Photographic coverage of the visitors to the main gate of the Cuban Embassy and logs of the movement of Cuban Embassy personnel have proved very useful in identifying new Cuban PCS employees in Mexico. Normally the Station has been able to match movements of new and old employees during the initial period when duties and contacts were being turned over to the new employees and so identify their duties. KDAFGHAN has provided current photographs of TDY and transiting Cuban officials and Headquarters has often provided positive identifications of these persons. Norberto Hernandez, a DGI headquarters officer visiting Nexico, was identified in this way.
- 2. The Station utilizes KDAFGHAN photographic coverage and logs to verify the visits of Station assets to the Cuban Embassy.
- 3. KPAFGHAN also provides coverage of what appears to be American visitors to the Cuban Embassy main gate. In the case of Americans who arrive in automobiles bearing U.S. license plates, the license plate number, car description, and sterile copies of photographs are given to the FSI for identification. A significant result of the KDAFGHAN operation included a photographic of a specific individual are old FBI target who had been seen visiting the Cuban installation.
- 4. KDAFGHAN also provided useful coverage for the KDACOUSTIC-3 operation, an operation aimed at the recruitment or defection of a DGI officer. This coverage enabled the Station to determine KDACOUSTIC-3's movements, an important factor in timing the calls and visits of our access agents. This use of the operation should prove extremely valuable during the coming year since a more aggressive recruitment program against the Cuban target is planned.

SECRET

# Problems and Security

No agent control or operational problems have been reported. Neither were there any security problems encountered during the period. Gerald D. FAHLANGER continues to be the Case Officer and handler of KDAFGHAN-1. FAHLANGER has met and could continue to meet KDAFGHAN-2 in an emergency. The alternate Case Officer is Terence D. SISTONE who meets KDAFGHAN-1 when FAHLANGER is not available. Both Case Officers are known to the assets in alias, and both meet KDAFGHAN-1 in a safehouse. During February 1971 the safehouse was changed in compliance with normal operational security. Meetings are generally held once a week. More frequent contact can be made by telephone. In an emergency, anyone can call KDAFGHAN-1 at his home and say they are a friend of "Pepe Simon." KDAFGHAN-1 will reply "I haven't seen him since last Christmas." KDAFGHAN-1 speaks English.

## Coordination:

The Ambassador is aware of our efforts against the Cuban target in general. He has not been specifically briefed on this operation.

## Future Plans:

The Station is constantly examining the possibility of an audio installation at the main gate of the Cuban Embassy. A successful audio device would serve, in most cases, to identify the individuals who are photographed by KDAFGHAN-1 since they normally identify themselves to the gate house attendant. There are a few Station assets who have occasional access to the gate house, and it is conceivable that one of them could place a quick plant device, provided security conditions are favorable. The Station currently has under consideration a recruitment effort against a lower level employee of the Cuban Embassy who would be of tremendous help in such an operation.

## Costs:

- 1. General: This renewal request is for FY 1972 in the amount of \$11,950 and FY 1973 in the amount of \$11,950.
- 2. Source of Funds: Project KDAFGHAN is included in the Western Hemisphere Division's Operating Program in the amount of \$10,844 for FY 1972 and \$10,844 for FY 1973. The additional Funds required are to be absorbed from within the WH Division allocation.

6.100,544

3. Project Budget: The following is a cost breakdown for the preceding, current, and next fiscal years:

<sup>\*</sup>Increases reflect the "cost-of-living" granted effective 1 January 1971.

- 4. Foreign Currency: There are no special requirements for foreign currency.
- 5. Commitments: Upon termination, the agents will be paid a termination bonus not to exceed three month's salary.
- 6. Funding: Case officers pay the assets directly. The funds are accounted for with end receipts obtained from the assets. KDAFGHAN-1 has sufficient private income to cover the JKLANCE funds he receives.
- 7. Accountability: All funds are accounted for by receipts and/or certifications as required by Agency regulations.

#### Purpose:

The LIONION Project provides the Mexico City Station with fixed, selective photographic and physical surveillance of the Cuban Embassy and Cuban Consulate in Mexico City. It is designed to provide information in support of Priority A, paragraphs 2 and 4 of the current Operating Directive, that is, the Cuban target present in Mexico and the support rendered by Cubans in Mexico to exile and other leftist groups in Mexico.

#### Description:

- 1. The LIONION Project currently encompasses two agents, LIONION/1 and LIONION/2, a basehouse directly across from the Cuban compound, and a safehouse for meetings with Station Case Officers. The two agents furnish photographic coverage during daylight hours of the main entrance to the Cuban Embassy. In addition, on a spot basis, photographic coverage and visual surveillance of the Cuban Consulate entrance is possible. The agents also act as dispatchers for the unilateral LIEMBRACE surveillance team when the LIEMBRACE team is being used against Cuban target individuals. A description of the individual assets is set forth below.
- 2. LIONION/1 (201-288248): A Cuban lawyer in exile in Mexico who left Cuba in 1960. He has been the principal agent of the LIONION Project since 1962. LIONION/1's cover is that of a translator and would-be writer. Family holdings in

Tampa, Florida, inherited from his deceased father also provide financial backstopping. LIONION/1 received his "immigrado" (permanent immigrant) status in 1965 and now has a good deal of immunity from harassment from Mexican immigration authorities. All photographic coverage of the main Embassy gate through final printing, cropping, and mounting is processed by LIONION/1. LIONION/1 and LIONION/2 maintain a log which indicates when a photograph was taken, and pertinent identifying data. License numbers of cars used by various Cuban Embassy personnel are recorded as well as license numbers of cars of unidentified persons visiting the Cuban Embassy.

3. LIONION/2 (201-305604): Mother of LIONION/1. Her cover is that of a dependent mother. As with LIONION/1, she has "immigrado" status and has been associated with the LIONION Project since 1962. LIONION/2 acts as LIONION/1's assistant and fill-in whenever he is away from the LIONION basehouse.

#### Changes:

During the project year, the pulse camera coverage of the Cuban Consulate entrance was discontinued. Little or no use was being made of the product from this camera. One reason for limited use was that there was no real way to readily fix the time--or the day-- a particular photo was taken. There were no other significant changes in the project during FY 1970.

## Accomplishments:

- 1. The LIONION production for FY 1970 consisted almost entirely of photographic coverage of visitors to the Cuban Embassy main entrance and of logs of the movement of Cuban Embassy personnel and visitors. This proved very useful in identifying new Cuban Embassy PCS employees in Mexico. The monitoring also revealed which cars the various employees usually drove.
- 2. LIONION also took photographs of what appeared to be American visitors to the Cuban Embassy front gate. In the case of Americans who arrived in automobiles bearing U.S. license plates, the license plate numbers, car descriptions, and sterile copies of photographs were given to LNERGO for identification.

3. The Station also used the LIONION photographic coverage and log to check on the reports of Mexican and other JKLANCE assets who claimed to have visited the Cuban Embassy. In the case of some assets, LIONION/I was given a photograph of the agent and told to be particularly alort at cortain times of certain days to confirm the agent's entry and exit. This proved particularly useful in checking AVDIME/I's story of contact with the Cubans. It also confirmed LIRELIC/I's visit to the Cuban Embassy at an early stage In Station recontact with LIRELIC/I.

## Problems:

- 1. No agent control or operational problems have been reported. Neither were there any security problems encountered during the period. LIONION/1 was mot in a safehouse on an average of once per week by Andrew E. PELLEMENT, in alias. Following PELLEMENT's departure in late May, Gerald D. FAHLANGER took over the responsibility for the LIONION Project. FAHLANGER, in alias, meets LIONION/1 approximately once per week. In January 1970, the Station had LIONION/1 change the safehouse used for meetings with Station officers. He signed a one-year lease on the new apartment, in alias. LIONION/1 uses the apartment on weekends and evenings to lend credence to the cover story he used in renting; i.e., that he lives out-of-town and maintains this small apartment in Mexico City for use during his frequent visits.
- 2. Station visits to the LIONION basehouse were limited to three during the reporting period. These were made during non-daylight hours. LIONION/1 picked up the Station officer away from the LIONION basehouse area and drove the officer to the basehouse in LIONION/1's own car. The basehouse has a driveway off the street entrance-way which facilitates entry during non-daylight hours.
- 3. During the Project Year, the pulse camera and the electronic equipment used with the LISAMPAN operations were removed from the basehouse, thus reducing the amount of compromising equipment in the basehouse.

## Coordination:

The Ambassador is aware of our efforts against the Cuban target in general. He has not been specifically briefed on this operation.

#### Future Plans:

- 1. The Station is re-examining the various points of view which the LIONION basehouse provides of the Cuban Embassy complex in order to determine what steps can be taken to improve the usefulness of the LIONION product. For instance, from the window in the room where the pulse camera proviously was installed, an excellent view can be had of the Cuban Embassy garden and the walkways between the three Cuban Embassy buildings—as well as the Consulate. The Station plans to have LIONION/1, on a spot—check basis, observe the garden area. In this way, the Station hopes to update its information on the location of the various officers' offices, the general pattern of movement and activity, etc. This area will also be observed during the night to see if it can be determined which areas are being used for living quarters or offices.
- 2. It is also planned to assess LIONION/1's ability to observe and draw appropriate conclusions from his observations, and to write these up for the Station.
- 3. Depending on the need for Consulate coverage, the installation of closed circuit-TV coverage of the Consulate entrance is being considered.
- 4. The Station is being queried as to emergency contact arrangements with LIONION/1.

## Costs:

- 1. General: This renewal request is for the period 1 July 1970 through 30 June 1971 (FY 1971), in the amount of \$11,094.
- 2. Source of Funds: Project LIONION is included in the Western Hemisphere Division's FY 1971 Operating Program in the amount of \$10,000.

3. Project Budget: The following is a cost breakdown for the preceding, current and next fiscal years:

| . <del>. 1. 1 </del>                                                                                                           | FY 1970<br>Estimated<br>Obligations | FY 1971<br>Request                | FY 1972<br>Projection             |

- 4. Foreign Currency: There is no need for foreign currency which the Station cannot provide. There are no non-JKLANCE funds involved in this project.
- 5. Commitments: LIONION/1 and LIONION/2 receive, in addition to their regular salary, the equivalent of one month's salary as a Christmas bonus. LIONION/1 is reimbursed for operational expenses related to the project. In the event of termination, each agent will receive thirty days actual notice.
- 6. Funding: All funds are passed by the case officers during the safehouse meetings with LIONION/1 who receipts for the funds on the spot. The amount of funds used under this project are not enough to arouse the suspicion of LIONION/1 by the authorities should he be apprehended. He has sufficient private income to cover the JKLANCE funds he receives.
- 7. Accounting: All funds are accounted and certified for in accordance with JKLANCE regulations.
  - 8. Annexes: None.

16 June 1969

MEMORANDUM FOR: Chief, Western Hemisphere Division

LIONION Project Renewal Request SUBJECT

1. Approval is requested of the LIONION Project for the poriod 1 July 1969 through 30 June 1970 (FY 1970) for \$11,994. Funds are available.

- 2. Project LIONION is a support project which provides the Mexico City Station with fixed photographic and physical surveillance of the Cuban Embassy and Consulate in Mexico City. The surveillance is conducted by two indigenous agents located in a basehouse directly across from the Cuban compound. At times the principal agent also acts as a dispatcher for the LIEMBRACE surveillance team. Information is radioed to the team concerning the departure of Cuban officials, thus allowing the team to remain a more discreet distance from the target.
- 3. As reflected in the attached Project Renewal, an audio device planted in the gatehouse of the compound could be monitored at the LIONION basehouse, aiding greatly in identifying visitors. Since the time the Station submitted the renewal, however, this device ceased to function along with the rest of the LISAMPAN devices. This installation was monitored through carrier current from the LISAMPAN/ LISASH basehouse, also situated in front of the compound. Since the connection between the two basehouses was by carrier current only, and since the agents in each basehouse are unaware of the other's activity, a possible compromise of the LISAMPAN/LISASH activity should not affect LIONION security.
- 4. Although the LIONION Project does not produce disseminable positive intelligence, it is considered by the Station as essential to its Cuban operations. The 4,100 or more selective individual photographs produced annually,

coupled with the visual observations, were effective in providing timely operational information. In addition, over 8,000 feet of pulse camera film is produced annually, recording the image of each visitor to the Consulate. The years of experience of the principal agent have given him intimate knowledge of the target personalities. He often brings matters to the immediate attention of the Station without having been levied the specific requirement to do so. As a result, the Station is aided greatly in keeping abreast of the day to day activities of the Cuban compound.

- 5. In recent months, the LIONION Project was useful to the Station in checking out statements made by ESMARROW-1.
- 6. In March 1969, the Project provided photos of three U.S. citizens who visited the Cuban Embassy and were suspected of being draft dodgers. The photos were passed to the FBI within three hours of the request for information.
- 7. Other than the loss of the audio device in gatehouse, there have been no changes. The operation continues to run
  - 8. Approval is recommended.

Ernest J. Tsikerdanos Acting Chief, WH/1

#### LIONION FROJECT RENEWAL

SECRET

## A. Objectives

- 1. Project LIONION, a long-term support project designed to provide fixed photographic, technical, and physical surveillance of the PBRUMEN Embessy and Consulate in Mexico City, has the following specific objectives:
  - a. To furnish photographic coverage during daylight hours of the main entrances to the target installation.
  - b. To operate as a listening post in support of technical operations against this target to complement the photographic coverage.
  - c. To radio dispatch physical aurveillance teams against persons associated with the target.
  - d. To assist the Station in compiling information for individual dossiers on officials of the target installation.
  - e. To fulfill various requirements in support of other Station PBRUMEN operations.
- The above-cited objectives are in agreement with the over-all objectives of Station Mexico City.

## B. Changes

Oliver D. CIMOCH assumed administrative and operational responsibility for Project LIONION in December 1967 and continued this responsibility until his departure in December 1968. Pending arrival of CIMOCH's replacement, the Project was handled by Station Officer Gerald D. FAHLANGER and Station WOACRE representative, Walter W. COLLBURY. On 28 February 1969, LIONION-1 was introduced to Andrew E. PELLEMENT, who assumed Project responsibility effective that date.

#### C. Intelligence Production

As an operational support project, Project LIONION does not produce disseminable positive intelligence. Quantitatively, during CY 1968, the Project provided over 4,000 selective individual photographs of persons and/or vehicles entering the target installation and over 8,000 feet of pulse camera film. There has

FORMATION BY STREET TRANSMISSION NO FREED GREECHRISHING

SECRET

been no formal audio product from Project LICNION since July 1968 when the transcription of the LISAMPAN/DOG traffic was terminated. As reported extensively in HAMA 36553, 19 February 1969, the Station has been unable to activate LISAMPAN/BAKER since 16 January 1969. A qualitative analysis of the LICNION product is discussed in paragraph D below. The Station is unable to evaluate the worth of the pulse camera operation since the bulk film, undeveloped, is pouched directly to Headquarters. The cost of this portion of the operation is minimal, however, since it is limited to the cost of the film and development at Headquarters. The camera works automatically and requires only minimal maintenance.

#### P. Effectiveness

- 1. Project LICHION is considered by Station Mexico City as essential to its PBRULEN operations. It has consistently proven highly effective and responsive to Station requirements of both long and short renge nature. LIONION-1, the Project's only full time agent, continues to furnish on a timely basis, information on the personalities and activities of the target personnel. LIONION-2 continues to backstop LIONION-1 and substitute for him when he is away from his post. At the age of 70, she is not able to man the LTONION base full time, and her sight is failing. She is able to photograph visitors, however, and live monitor the LISAMPAN/DOG traffic. LIONION-2's role as a backstop to LIONION-1 insures continuous coverage of the target during daylight hours, five days a week. LIONION-1's more than six years of experience working on the same target continue to produce an increasingly complete and accurate identification of the staff and visitors to LIKING. These years of experience have developed an agent knowledgeable of WOFIRM operational and security requirements who will often bring to the Station's attention those matters which he feels are of immediate interest without having special requirements levied upon him and without waiting for the next regularly scheduled meeting with his Station contact. He has on numerous occasions notified the Station of the presence of suspect PBRUMEN security types. has also frequently passed along operational leads of use to the Station in other aspects of its PERUMER operations.
- 2. The addition of LISAMPAN/DOG to the LIONION besenouse has noticeably increased LIONION-1's ability to identify new visitors to the target and at times, determine the nature of their business. The LISAMPAN/DOG product was channeled to the LIONION basehouse by carrier current from LISAMPAN/LISASH on 10 April 1968. Since its primary value is as an aid to LIONION-1 in identifying LIRING visitors, its product has not been recorded

SECRET.

or transcribed since July 1968. LIONICH-1 live monitors the treffic from his basehouse. LISA: PAN-1 who mans the LISASH base has been told nothing of the LICHION base and LIONICK-1 was offered no explanation concerning the manner in which LISASPAN/DOG production is channeled to him. Thus a possible compromise of the LISASP basehouse, linked directly to LIRING, would not compromise the LICHION basehouse which has no direct link with the target.

- 3. Project LIONION was of direct assistance to the Station on two separate occasions in recent months:
  - a. As a result of information received on a priority basis (the same day as requested) from LIONION-1, the Station was able to verify certain statements made by ESMARROW-1 concerning the location of LIMING officials at specific times. LIONION-1 reported the times at which these officials ceme in and out of the LIMING compound and provided a description of the clothes they were weering at the time. LIONION-1's information raised the possibility that ESMARROW-1 might at least have been confused in his reporting of the times at which he met LIMING personnel, etc.
  - b. In March 1969, LIDMICN-1 was able to provide pictures of three WOLADY males, who, although unidentified, fitted the general description and time frame furnished by INERGO. The latter suspected that two or three WOLADY draft dodgers might visit LIRING to arrange travel to PBRUNEN. The Station was able to furnish INERGO with pictures of the three together with a report of their arrival and departure from LIRING within three hours of its request for information. Additional information was promptly forwarded to INERGO as it became available from LICNICN-1.
- 4. During the past year, LTCMION-1 acted as a dispatcher for the LIEPMRACE surveillence team on a number of occasions. By utilizing his ventage point in the area of the target, he is able to radio information to the LIEPMRACE team on the arrival and departure of LIRING officials thus allowing the team to remain at a distance from the target unseen by possible countersurveillence from the target. The Station plans to use LIONION-1 in this role more extensively in the coming year whenever surveillance of LIRING personnel entails the team's presence rear the LIRING compound. Such utilization of LICNICN-1 should leasen the risk of exposure of the team to the PERULE IS.

L. O. Ashim almitist

high level of productivity that has characterized his work in past years. As mentioned above his response to priority requirements continues to be most gratifying. He is prompt in submitting both operational and administrative reports to the Station. He is ready, at a moments notice, to change personal plans when a need for his services arises. After five years without a substantial vacation, LIGTICM-1 plans a three week trip from 4 - 25 may to Europe (Italy, Greece, France) and the U.S.A. He originally requested five weeks to make this trip for which he has long saved his money, but quite willingly shortened the trip to three weeks at the Station's request and added that he would postpone the entire trip if the Station thought his services were more needed at home. In order to help defray the cost of making a second trip to Europe to complete his original itinerary, the Station will give LICNION-1 a gift of \$250 on 1 May 1969 and will tell him that consideration will be given in 1970 to providing an equal amount, but no decision can be made on that second gift until mid-1970.

## E. Problems

- 1. LISAPPAN/BAKER: As reported in HELA 76553, 19 February 1969, LISAPPAN/BAKER was turned off for security reasons on 16 January 1969 at 1345 hours. All subsequent attempts to reactivate it have been unsuccessful. Headquarters was requested to review all available Station information on this to decide whether BAKER's abrupt end was the result of a compromise or whether it was somehow connected with the installation of TELEX equipment at LIRING.
- 2. LISALPAN/DOG: The LISAMPAN/DOG/EXTRAP installation is generally working well. There have been numerous occasions when due to unknown circumstances the audio reception has either been bad or non-existent. Walter W. CORNEURY and PELLEMENT visited the LISAMPAN/LISASH basehouse and found no problem with the monitoring equipment there. The trouble may have resided with the central office of the LIRISK company and was probably not the result of technical counter-surveillance of LIRING. As of 3 April 1969, LISAMPAN/DOG was working properly and automatically.
- 3. There have been no significant personnel, security, morale or administrative problems since the last project renewal.

#### F. Liaison

FERNAND TO BY SHEET TRANSLESSION

S E C R E T KO FISLD DISSEMINATION

#### G. Interagency Coordination

Not applicable to Project LIONICM.

#### H. Plans

- I. The Station plans to continue to exploit LIONICE-1's experience, training and location to provide the photographic and technical coverage cited above. In addition, the Station will continue to make use of LIONION-1 as a dispatcher in surveillances of LIRING personnel.
- 2. In order to check the LISAMPAN/DOG take for items of possible value to other Station operations, LICAMPAN/1 will be instructed to record the DOG traffic for the three week period while LICATON-1 is on vacation. These tapes will be given to Richard C. HABOUSH for an analysis of their operational worth and technical quality. HABOUSH will transcribe them if the contents warrant.

## I. Costs

- 1. For the past project year, 1 January 1968 through 30 June 1969, it is estimated that the total project cost will be about \$16,250. It is approved for \$16,632.
- 2. For the renewal period of 1 July 1969 through 30 June 1970, it is requested that \$11,894 be approved. Estimated figures for FY 1971 are provided below together with the breakdown for FY's 1969 and 1970. The major addition to the FY 1971 figures is a possible raise for LIONION-1 and LIONION-2. These figures are broken down as follows:

|                                                                        | FY 1969                  | FY 1970                  | FY 1971                  |

APPROVAL

SECRET

SIGNATURE

10 January 1959

MINORALDUN FOR: Chief, Wil Division

SUBJECT

: Renewal of Project LIGHION

1. Approval is requested to renew Project LIONION for the period 1 January 1968 through 30 June 1969 for \$16,632 including \$5,374 for FY 1968 and \$11,258 for FY 1969. IN Division programmed \$11,800 for this activity for FY 1969 and funds are available. Funds requested for this renewal are slightly less than the previous year due to a reduction in support costs.

- 2. This project provides Station Nexico City with photographic and physical surveillance of the Cuban Rebassy and Consulate in Mexico City. In addition, the project principal agent is able to observe and record the patterns of activity and personal associations of various Cuban personnel and visitors to the Rebassy and Consulate. This effort has been of assistance in planning recruitment attempts against target personnel. The principal agent also performs ad has functions for the Station such as dispatching the surveillance team against selected Cuban personnel and renting and maintaining a safehouse. This project maturally does not produce positive intelligence.
- 3. Plans for the forthcoming period include using the project basehouse and the two project agents as LP operators in the expansion of an existing technical operation targeted against the Cuban Embassy. There is also a possibility that the photo coverage of the Cuban Consulate entrance will cease shortly as this coverage has not groved particularly useful. It is not anticipated that these changes will substantially affect the cost of the project.
- 4. It should be noted that the (%),800 operational loan made to LIONIQN-2 in Poblicary 1956 has been completely reyaid. The security of this project is considered satisfactory.

S/EATT. # 2 & HMMA. 33595

50-6-122/1 H/WATT - 16 HMMM- 33595

#### PROJECT LIONION RENEWAL REQUEST

#### A. Objectives:

- 1. Project LIONION is a long-term support project designed to provide fixed photographic, technical, and physical surveillance of the PBRUMEN Embassy and Consulate in Mexico City. The specific objectives are:
  - a. To furnish photographic coverage during the daylight hours of the main entrances to the target installations.
  - b. To maintain in readiness a listening post to support technical operations against the targets.
  - c. To radio dispatch physical surveillance teams against persons associated with the targets.
  - d. To provide for a mechanism which can fulfill various miscellaneous PBRUMEN support requirements.
- 2. The above-cited objectives are in agreement with the over-all objectives of Station Mexico City.

## B. Changes:

In late January 1967 the operational and administrative responsibilities for Project LIONION were transferred from Howard A. TRECKLER to Cornelius L. PEUVION. No agent handling, control, or administrative problems were encountered during the past year.

#### C. Intelligence Production:

As noted in Section A above, Project LIONION is an operational support project and does not produce disseminable positive intelligence. During the past year this project did provide over 5000 individual photographs of persons and/or vehicles entering or leaving the target installations, as well as approximately 8000 feet of pulse camera film. Information on the comings and goings of target personnel and visitors to the installations, which LIONION-1 provides in daily logs, has been incorporated into Station files and on occasion made available to other stations or LNHARP agencies, i.e., LNERGO. LIONION has been particularly useful in spotting new employees whose photos are then passed to LITAMIL-7 for identification.

## D. Effectiveness:

- 1. Project LIONION is considered by the Station to be highly effective and essential. In addition to providing the valuable photographic coverage cited above, LIONION-1 continues to provide interesting observations on the personalities and activities of the personnel working in the targets. LIONION-1 reporting is being incorporated into the recruitment operations targeted against LIRING-2 and LIRING-16.
- 2. In early July LIONION-I obtained and furnished a new safe apartment which is being used for sensitive or lengthly meetings with LIRESORT-I as well as LIONION-I. The safe site has been stocked with a sufficient supply of food so as to allow two persons to live there for at least three days in the event the Station ever needs a cooling-off site for an agent or defector.
- 3. Throughout the past project year LIONION-1 continued to function effectively as the radio dispatcher for the LIEMBRACE Surveillance Team. Much of this effort was expended in estimating the movement/habit pattern of LIRING-2, a prerequisite for his pending recruitment.

## E. Problems:

- 1. On 27 June LIONION-1 was hospitalized for emergency surgery to treat a perforated ulcer. Since LIONION-2's presence was required at the hospital during the operation and also throughout the postoperative convalescence period, photographic coverage was suspended until 10 July.
- 2. Other than a temporary postoperative morale slump on the part of LIONION-1, there have been no significant personnel, security, or administrative problems.

## F. Liaison:

Not applicable to Project LIONION.

G. Interagency Coordination:

Not applicable to Project LIONION.

#### H. Plans:

1. The Station plans to continue to exploit LIONION-1's experience, training, and location to provide the photographic coverage cited above. In addition, the Station plans to make more extensive use of the operational log books and personality observations provided by LIONION-1 in support of an intensive physical penetration program.

2. During the ensuing period, the Station plans to utilize LIONION-1 and LIONION-2 as LP operators for a portion of the LISAMPAN technical penetration operation. It is anticipated that this additional task will not be levied on LIONION-1 and LIONION-2 until after 1 January 1968.

#### I. Costs:

- 1. For the past project year, 1 January through 31 December 1967, it is estimated that the total project cost will be about \$9,000. It is approved for \$11,666.
- 2. For the renewal period of 1 January through 31 December 1968, it is requested that \$11,258 be approved. This is broken down as follows:

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | FY 1968  | FY 1969  | Total    |

3. It should be noted that the operational loan made to LIONION-2 to enable her to qualify for inmigrado status in Mexico (see Cost Section of previous project renewal request) has been completely repaid. The loan, which was placed in an escrow-type account, was withdrawn in monthly increments by LIONION-1 and incorporated into his revolving fund. A detailed accounting was prepared each month by LIONION-1, a practice which will be continued during the ensuing project year.

## J. Technical Annex:

Project LIONION continues to receive excellent technical support from the local WOACRE representative, Walter W. CORNBURY.

## K. Other:

While LIONION-2's failing eyesight precludes her filling in for LIONION-1 over any extended period of time, she has continued to perform in an excellent manner in support of LIONION-1.

# CLASSICION FROCESSING ACTION DISPATCH SECRET MARKED FOR INDEXING Chief of Station, Mexico City NO INCESSING REQUIRED ) Chief of Station, JHWAVE GSEY QUALIFIED DESK CAN JUDGE INDERING Chief, Western Hemisphere Division LIONION ACION REQUIPED - REFERENCES Action Required: See Below ... 1. Prior to submitting the LIONION project for renewal 1 January 1968, Headquarters requests the Mexico City station comment on the desireability of continuing the photography of persons entering and leaving the PBRUMEN Consulate. As the station is aware this film is no longer reviewed at JHWAVE and there are no present plans to resume this practice since in the past it proved unproductive and costly. The film has never been reviewed on a regular basis at Headquarters and has been referred to only once for identification purposes during the past year. At present the film as received at Headquarters is developed (negatives only) and placed into storage. Readquarters realizes this coverage is potentially valuable and undoubtedly this film contains photographs of assorted revolutionaries and others of CI/FI interest; but the value lies in the ability to identify the persons being photographed and until we have this capability and personnel to sort out and follow-up the leads - there seems (Continued..) 4 January 1967

MEMORANDUM FOR: Chief, WH Division

SUBJECT: Renewal of Project LIONION

(Photographic/Technical Coverage

of Cuban Embassy in Mexico)

ACTION REQUIRED: Approvals Requested Paragraphs One and Four

1. Approval is requested to renew Project LIONION for the period 1 January through 31 December 1967 at an annual expenditure of \$11,666.00, including \$5,574.00 for FY 1967 and \$6,092.00 for FY 1988. WH Division programmed \$12,000.00 for this activity for FY 1967 and funds are available. The Project cost has been increased by \$668.00 over the previous year, occasioned by a small monthly raise for the Principal Agent and a new provision for miscellaneous operational expenditures.

2. Although this two-man Project does not produce positive intelligence, it contributes substantially and directly to the coverage of the Cuban Embassy and Consulate in Mexico, producing photographs in bulk of personnel and visitors as well as information on patterns of activity and personal associations, and supporting recruitment attempts. It is contemplated that the Project will afford support to the extensive technical penetration of the Cuban Embassy (LISAMPAN) currently scheduled for installation in mid-January 1967. One of these penetrations is scheduled for the Embassy gatehouse where visitors would normally identify themselves upon entering. Information from the gatehouse is to be transmitted securely to the LIONION basehouse as well as to the LISAMPAN listening post. By collating this and other LISAMPAN information with the photography, it is hoped to be able to identify photographically many of the visitors to the Embassy.

- 3. The physical security of the photo-basehouse has been improved and the overall security of the Project is considered to be satisfactory.
- 4. It will be noted that in February 1966 the Station assisted LIONION-2, a Cuban citizen, to qualify for Mexican immigrant status with a loan of \$4,800.00. which was reduced to \$2,640.00 as of 31 December 1966 at a repayment rate of \$240.00 per month. This loan is being protected by an appropriate Memorandum of Trust. Approval is requested to continue this arrangement until LIONION-2's immigration status is settled, estimated to occur by 30 November 1967.

W. J. Kaufman Chief, WH/1

#### LIONION PROJECT RENEWAL

### A. Current Objectives:

There have been no changes in the objectives of the LIONION Project as set forth in the renewal request of last year.

## B. Changes:

Howard A. TRECKLER has assumed the duties of Case Officer for LIONION since the departure of Lawrence F. BARKER in August 1966. TRECKLER is known to LIONION-1 and 2 as "Jose" or "Joe". TRECKLER meets with LIONION-1 at least once each week and sees LIONION-2 only if he visits the LIONION basehouse. With the departure of Hugh T. FRANKOTTE (P) in August 1966, Walter W. CORNBURY (P) assumed the duties of technical consultant for the project. CORNBURY is known to LIONION-1 and 2 as "Jack". LIONION-1 is being given a pay increase of \$8.00 (U.S.) per month effective 1 January 1967. There are no other changes contemplated for the coming year.

#### C. Intelligence Production:

The intelligence production is the same as that reported in the renewal request for last year. It is difficult to estimate the intelligence value in numbers of reports as there are so few positive reports made from this type of production on the photographic end of the project. But this photographic coverage is of inestimable operational intelligence value in coverage of the PBRUMEN target. Should the LISAMPAN operation become active, part of LIONION's time will be used in support of that operation.

#### D. Effectiveness:

The Station's estimate of the value of this project has not changed from that expressed in the renewal request of last year. LIONION has further established his importance to the Station's operational activities by demonstrating his ability to spot surveillance targets at LIRING from only a physical description provided by the Case Officer. If the planned LISAMPAN activity gets underway, LIONION observations and insight into activities of LIRING will be increased greatly.

The apartment spotted by LIONION-1 and obtained by the Station across from LIRING that was mentioned in last year's renewal request is scheduled to be utilized in the LISAMPAN operation. The location of LIONION-1 across from the target and his background knowledge built up over the years are invaluable assets to the Station's coverage of the primary target of the Related Mission Directive.

#### E. Problems:

There were no major problems during the past year. One security problem involved the claimed spotting of some of the photographic equipment from the street by David M. WILSTED (P). A thorough check of the basehouse by LIONION-1 and the Case Officer failed to reveal any such equipment as being visible from the street. However, additional security measures were taken by darkening the background in the room behind the equipment through hanging of heavier drapes on the window, drapes on the wall, and putting up a portable screen behind the equipment. This also serves as a security check against the prying eyes of the household servant as LIONION-1 can now open the door fully to the room when the servant pages him and she cannot see the equipment. The other problem is the obtaining of inmigrado status for LIONION-2. This involves the depositing of funds to a bank account and is discussed under paragraph I.

### F. Liaison:

There is no liaison involved in the project.

G. Interagency Coordination:

Not applicable.

### H. Plans:

It is planned to have LIONION-1 keep special logs on the activities of selected targets in LIRING as he has done over the past year. With the case officer handling LIONION-1 directly on a weekly basis, it is planned to continue picking his brains for additional details on the LIRING target. Hopefully LIONION-1 and 2 will be utilized for assistance in covering the proposed take from the LISAMPAN operation.

### I. Costs:

For Calendar Year 1966:

- 1. In the period 1 January through 30 June 1966, \$4,500.00 was expended. The projected expenditure for July 1966 through 31 December 1966 is \$5,000.00. This total project year expenditure is approximately \$1,000.00 under that approved by Headquarters. However, this amount is probably due to having drawn film and other supplies from overall Station support without their having been charged off against the Project
  - 2. For the period 1 January 1967 through 31 December 1967.

| Miscellaneous  | Operational | •              |            |
| Expenditures   | •           | 250,00         | 250,00     |
| and the second | TOTAL       | \$5,574.00     | \$6,092.00 |

The total for FY 1967 is \$11,666.00. Approval of this amount is requested. Note that the salary figures include the salary raise for LIONION-1 and the usual one month pay Christmas bonus for LIONION-1 and 2. An additional provision has been made for miscellaneous operational expenditures as there may be a recurrence of same as in the past project year for which no provision was made. Provision is being made for charging of funds for supplies to the LIONION Project which was not done last year in order that more accurate bookkeeping may be followed.

In addition, the Station has had to make a loan to LIONION-2 for gaining status to qualify for inmigrado status in Mexico. This loan is held in a savings account in a Mexican bank to prove to the Mexican authorities that LIONION-2 can support herself. Funds are withdrawn from this account monthly, sometimes with interest, and deposited to a checking account where LIONION-1 withdraws the funds and they are applied to the revolving account for financing the operation. The initial balance deposited to the account in February 1966 was \$4,800.00. Withdrawals have been made at the rate of \$240.00 per month and as of 30 October 1966, the total account had been reduced by \$1,680.00, leaving a balance in the account of \$3,120.00 which should carry the account through November 1967. A separate dispatch follows with the Memorandum of Trust and necessary details on the account. Approval is requested for continuance of this account in order that LIONION-2 may obtain her inmigrado status.

#### J. Other:

LIONION-2 continues to perform in an excellent manner in support of LIONION-1.

### SECRET/KAPOK

- A. <u>Current Objectives</u>. The original objectives of the project have not changed but have been added to in the last year. The project is functioning well as a technical (primarily photographic) surveillance operation against the PBRUMEN Embassy in Mexico City. It is designed to:
  - Furnish photographic coverage during daylight hours of the two entrances of the target installation.
  - Dispatch physical surveillance teams against persons associated with the target.
  - 3. Keep in readiness a Matering post (LP) for the monitoring and recording of technical penetrations of the target.
  - 4. Assist the Station in building up individual dossiers on officials of the target installation.
  - Monitor Station activities involving direct contact with the target, and furnish an observation post (OP) for other Station assets.

Objectives 4 and 5 are additions to those objectives set forth in the original project outline.

B. Changes. There have been no changes in personnel and none are contemplated in the coming year. It is being proposed in separate correspondence that some of the work load now on LIONION-1 be shifted to Headquarters, specifically the development of film.

LIONION-1's pay was increased 40 dollars a month effective 15 March 1965.

- C. Intelligence Production. The operation has produced thousands of excellent photographs, many of which are shared with Headquarters and Station JMWAVE. Information on the comings and goings of target personnel and visitors to the target installation has been incorporated into many Station files (primarily personality files -- individual dossiers). No precise statistics are available on this production. It has been very heavy. Station JMWAVE should perhaps be called upon for an independent evaluation of LIONION production it has received.
- D. <u>Effectiveness</u>. The project is considered both highly successful and <u>essential</u> by the Station. In addition to excellent photographic coverage provided by the LIONION agents, the Station has found in LIONION-i a first class asset for other operational duties. The LIONION basehouse was essential to mounting and monitoring the LIRHYME recruitment (and harassment) operation. C/O Wallace B. ROWTON sat with LIONION-1 for several weeks, observing the movement pattern of LIRHYME-1. LIONION-1 manned one of three radios used by the Station when LIRHYME

SECRET/KAPOK

was invited to appear for confrontation outside the Embassy. Without the LIONION base and the expert knowledge of LIONION-1 of target personnel and activities, such an operation as LIRHYNE could not have been mounted. It might be noted that this operation was an attempt to satisfy the top priority requirement laid on Station Mexico by Headquarters. It is expected that additional similar operations will depend to a large extent on the facilities provided by the LIONION operation.

Another very effective performance by LICNION-1 was his obtaining -- by sharp observation and quick, intelligent, secure action -- an apartment in a building directly across the street from the target Embassy. The Station had been seeking an apartment in this building for many years.

F. Problems. The problem of cover for LIONION-1 worked out well during the year to the point where it ceased being a problem. By living his cover as a translator he was enabled to build in strong self protection when called upon to do some translations for the office of the President of Mexico. Toward the end of the year, LIONION-1 received the coveted status of "inmigrado" which confers a great deal of immunity from harrassment by Mexican authorities.

The only problem now besetting the project is LIONION-1's excessive work load. As indicated above, an attempt is being made to alleviate this load.

- F. <u>Liaison</u>. The operation has no liaison connection. LIONION-1's connection with the Mexican Presidency is non-operational.
  - G. Interagency Coordination. Not applicable.
- H. Plans. It is planned to make better use of LIONION-1's observations and operational log books during the coming year rather than settle for his excellent photographs alone. It has been found that he can often supply valuable additional information because of his "feel" for those persons who are under constant observation from the LIONION base. LIONION-1 can read significance into activity which might go unnoticed or be misinterpreted by observers with less experience. LIONION-1 will also be called upon for assistance in future recruitment operations as in LIRMYME. Several such operations are being contemplated for calendar 1966, the period for which project is being requested.

### I. Costs.,

1. For calendar 1965:

In the period 1 January through 31 October 1965 \$7,218.20 had been expended. At this rate some \$9,200.00 will be expended in the concluding project year.

SECRET/KAPOK

# SECRET/KAPOK

# 2. For the next period (calendar 1966):

| Monthly co | sts               |           |
|------------|-------------------|-----------|
| Salaries:  | LIONION-1         | \$ 360.00 |
|            | LICNION-2         | 150.00    |
| Rents: :   | LIONION Baschouse | 100.00    |
| ,          | LICNION Safehouse | 44.00     |
|            | Utilities         | 25.00     |
| Supplies:  | Film              | 95.00     |
|            | Paper             | 60.00     |
|            | Chemicals         | 25.00     |
|            | Miscellaneous     | 15.00     |
|            | Monthly total     | \$ 874.00 |

Allowing for customary year-end bonuses of one month's salary for both agents, the figures for FY 1966 and FY 1967 would be \$5,244.00 and \$5,754.00 respectively, or a total for the calendar year 1966 of \$10,998. Approval of this amount is requested.

J. Other. LIONION-2, although not specifically mentioned above, continues to perform in a splendid manner as assistant to LIONION-1.

MEMORANDUM FOR: Chief, WH Division

SUBJECT

Renewal of Project LIONION (photographic/ technical coverage of Cuban Embassy in

1. Approval is requested to renew Project LIONION for the period 1 January through 31 December 1966 at an annual expenditure of \$10,998.00, including \$5,244.00 for FY 1966 and \$5,754.00 for FY 1967. We Division programmed \$10,750.00 for this activity for FY 1965. Funds are available. The Project cost has been increased by \$520.00 over the previous year, occasioned by a small raise for the Principal Agent.

2. The Project has contributed substantially and directly to coverage of the Cucan Embassy and Consulate in Mexico and is considered highly successful and essential by Station Mexico City. It has produced a large quantity of excellent photographs of target personnel and visitors and has furnished valuable data on their patterns of activity and personal associations. It has also rendered valuable support to Station recruitment attempts against Cuban Embassy personnel and maintains an ever ready facility for support of any technical penetrations of this target accomplished by other Station activities. The Project has had no security or administrative problems. The Station has submitted regular progress reports.

M. J. Kaufman

#### LIONION PROJECT RENEWAL

- A. Current Objectives: This Project is a technical, currently primarily photographic, surveillance operation against the Cuban Embassy and Consulate in Mexico City. Its original objectives, still current, include furnishing photographic coverage during daylight hours of the Embassy and Consulate entrances; furnishing a control point for dispatching physical surveillance teams against persons associated with the target; and furnishing a listening post (LP) in readiness to monitor and record technical audio penetrations of the target. Two new objectives added during the Project year include assisting Station Mexico City to build up individual dossiers on target officials; and affording an observation post for Station activities involving direct contact with the target. These new objectives are in consonance with Priority A, Objective 1 of the current Related Mission Directive for Station Mexico City.
- B. Changes: There have been no changes in personnel and none are contemplated during the coming year. Headquarters is assuming the task of developing some of the film exposed under this Project. LIONION-1's pay was increased \$40 per month effective 15 March 1965.
- C. Intelligence Production: The Project is not designed to produce disseminable information. It produced thousands of excellent photographs during the year which were shared with Headquarters and Station JMWAVE. Information on the comings and goings of target personnel and visitors to the target have been incorporated into many Station files, principally the dossier files. No precise statistics are available, but at least 100 exposures are made daily during target working hours.
- D. Effectiveness: The Project is considered highly successful and essential by the Staton. In addition to the excellent photographic coverage provided, LIONION-1, the Principal Agent, has developed into a first-class asset for other operational duties. The Project Basehouse was essential to mounting and monitoring the Station's attempt at recruitment and subsequent harassment of a sensitive target employee. The Case Officer in charge of the attempt sat with LIONION-1 for several weeks observing the movement pattern of the target employee. LIONION-1 manned one of the radio dispatch posts used to control the physical surveillance of the target employee while near the Basehouse.

Without the Baschouse and LIONION-1's expert knowledge of the target personnel and activities, such an operation could not have been mounted. The operation itself was an attempt to satisfy the top priority requirement laid on Station Mexico City by Headquarters. It is expected that future similar operations will depend to a large extent on the facilities provided by this Project.

Another very effective performance by LIONION-1 was his obtaining, by sharp observation and quick, intelligent and secure action, an apartment in a building directly across the street from the target. The Station had been seeking an apartment in this building for many years.

E. <u>Problems</u>: The only problem currently besetting the Project is the excessive work load on the Principal Agent. To alleviate this, Headquarters is assuming the task of developing some of the film produced by the Project.

Cover for LIONION-1 has ceased to be a problem. He has received his permanent immigrant status and now has a good deal of immunity from harassment from Mexican immigration authorities. He was able to get his translator cover backstopped directly out of the Office of the President of Mexico and thus has a strong protective security factor built into it.

- F. <u>Liaison</u>: The Project has no liaison connection. LIONION-1's cover backstop with the Office of the President of Mexico is non-operational.
- G. Interagency Coordination: Not applicable.
- H. Plans: It is planned to make better use of LIONION-1's observations and operational logbooks during the coming year rather than to settle for his excellent photographs alone. It has been found that he can often supply valuable additional information because of his "feel" for those persons who are under constant observation from the Basehouse. He can read significance into activity which might go unnoticed or be misinterpreted by observers with less experience. He will also be called upon for assistance in future recruitment operations similar to the case mentioned in paragraph D above. Several such operations are being contemplated for calendar year 1966, the period for which the Project renewal is being requested.
- I. Costs: For calendar year 1965:

In the period 1 January through 31 October 1965, \$7,218.20 has been expended. At this rate, some \$9,200.00 will be expended by the end of the calendar year 1965.

MEMORANDUM FOR: WII/E

SUBJECT

LIONION Project

- 1. LIONION is a new project which is submitted in the amount of \$10,478. This is a photographic surveillance operation targetted against the Cuban Embassy in Mexico City. Two agents are involved; LIONION-1, a young Cuban lawyer in exile, and LIONION-2, his mother. The agents act as observers and photographers. LIONION-1 is also used as a dispatcher for the LIEMBRACE surveillance team, from which he is compartmented, to cover individuals associated with this target. These agents were previously used in connection with the unilateral telephone tap operation against the Cuban Embassy. The current photographic operation began in the latter part of 1962, and was previously funded under Cuban FI funds. The operation has provided valuable data for the identification of Cuban Embassy personnel and visitors, and on their patterns of action and personal associations.
- 2. The security of this operation, particularly the agent's cover for status and the communications arrangements, appear reasonably sound. Both agents know that they are working for AIS, and LIONION-1 was successfully FLUTTERED in October 1963. However, LITAMIL-7 and LITAMIL-9, who are penetrations of the Cuban Embassy, are aware of this activity, as they are used to help identify individuals photographed.
- 3. Approval for the LIONION Project is recommended. It is requested that, in order to assist Headquarters' evaluation, project reporting include details of CI/CE data furnished, and examples of leads developed from such information.

GERARD DROLLER
C/WH/POA

PERCUADUR FOR: Chief, Mestern Mentsphere Division

CUMPECT : : Approval of Project LIGHTON

1. Approval is requested of the attached LICHICH Project Outline, and authorization of an annual expenditure, effective 1 January 1965, ef \$10,870 (FZ 65-\$5,00%; FZ 65-\$5,87%). Funds are available for this project.

- 2. Mexico Station agents LITMHL-7 and LITMHL-9, penetrations in place of the Cuban Embassy, are aware of the existence of the LICHION photographic activity. This knowledge on the part of these two assets is essential to the exploitation of the photographic take.
  - 3: Wil/1 recommends approval of the LICHION Project.

W. J. Bauthan
